Olympic Advanced Dental Table™

The Modern Dental Table for All Procedures *A New Standard in Sterility, Efficiency and Ergonomic Comfort*

Now Featuring
**Integrated Thermo-Safe™
Warming System!**

Efficiency, Perfected... Save Time On Every Procedure

The key to improving efficiency and preventing repetitive stress injuries is positioning everything you need at your fingertips, so that you are never reaching awkwardly for controls or supplies. Only the Olympic Advanced Dental Table features floating swing arms that allow you to position your instrument tray, IV pole, patient monitor, anesthesia unit, procedure light, high-speed dental unit and laptop in the precise locations that match your body mechanics, minimizing strain on your arms, shoulders, neck and back. And because all your equipment is moving up and down as a single operator, you can now move from seated to standing with ease, either for ergonomic comfort or better patient visualization.

Finally... A Safe, Reliable, No-Fuss Warming System

The Olympic Advanced Dental Table is now available with our exclusive Thermo-Safe™ Warming System, a fear-free warming system. Unlike other warmers that rely on a single thermostat, the Olympic warming system continuously monitors 6 thermostats on the patient surface to help assure a patient's safety and comfort at all times, typically eliminating the need for under-patient warming.

Achieve a higher level of sterility in less time.

The Advanced Dental Table leaves your floor clean, accessible and caster-free. And with Olympic's new *Sterile-Max™ Cleaning System*, all fluids are collecting in a high-visibility channel that can be wiped down and disinfected in seconds, eliminating the need for a removable trough that requires an awkward trip to the sink.

Reduce Overall Construction Costs

The Olympic Advanced Dental Table can pay for itself on day one by reducing your square footage requirements. By integrating everything you need on the table's floating swing arms, you eliminate up to 7 wheeled stands from your operator, typically reducing your square footage requirement by 20–25 square feet. This can make the difference between fitting a second dental table in a room built for one, or repurposing a small room as a new dental suite. Another way this table reduces construction costs is by eliminating the need for expensive overhead lighting. Olympic's integrated LED procedure lights provide all the light required with no installation costs.

All your dental equipment at your fingertips

STANDING
Extra tall 44"

SEATED
Comfortable 32"

Better Patient Presentation

Patient presentation can be adjusted instantly during procedures for better visualization. Electric lift adjusts from seated 32" to extra tall 44". Tilt adjustment up to 10°, V-positioner adjusts to 45°.

Move for Easy Cleaning

Mounted on heavy duty 3" locking casters, so it can be moved for area cleaning. Just unplug one power cord and you can roll the entire operator.

Sterile-Max™ Cleaning System
All fluids are collected in a high-visibility channel that can be wiped down and disinfected in seconds.

Thermo-Safe™ Warming System
Continuously monitors 6 thermostats on the patient surface to help assure a patient's comfort and safety.

Pre-Installed Sockets for Customization
Add Olympic accessories or your preferred anesthesia, dental unit, patient monitor, or other ancillary equipment.

Eliminate Need for Ceiling-Mounted Light
Choice of 3 LED procedure lights. Brightness up to 60K Lux, dimming and color selectivity.

Reduce Clutter
Integrated Power Strip centralizes all electrical connections in one place so there are no cords on the floor.

A Dental "Cockpit" – All your instruments and equipment are mounted on Swing Arms for perfect positioning. You save time and work in ergonomic comfort.

Dental Head Rest – An efficient work platform. Supports patient's head on reinforced stainless steel surface. Rapid drainage. Rounded arm rests.

Compressor Storage – Compressor stores on table base behind post. Compressor Cart available to dampen vibration.

Rock-Solid Operatory Surface – The heavy-duty construction eliminates all bounce and wobble, even when someone leans on table.

Large Table Top Surface – Full 62" length x 21" width for patients of all sizes.

Tie Down Cleats – 3 on each side of table, for securing patients safely.

Olympic Hi-Lo Wet Table™

Better presentation – More comfortable
The Only Wet Table With Adjustable Height And Swing Arms

Wet Table Features

This is the modern wet table that replaces wooden built-ins. Offers height adjustment and useful accessories, also converts easily to a fully equipped dental table.

Enclosed Electric Lift – Precision height adjustment. Patient capacity 250 lbs. Clean, fully enclosed.

Ergonomic Comfort – Work seated or standing on large or small patients. Meets ergonomic standards.

Better Patient Presentation – With adjustable height. More efficient, faster treatments.

Large Surface – 60"x 24", 2 removable grates.

Rock Solid – Reinforced all welded steel construction. No bounce or wobble. A better work platform.

Leveling Feet – Assure solid work surface.

Swing Arms – Choice of one or two Swing Arms with drop-in sockets for IV Pole, Light, and more. Hold 60 lbs each. Go up/down with table. Arms lift in/out of brackets on column without tools.

Choice Of Accessories – The only wet table that provides useful accessories for both wet and dry treatments and dental procedures.

Install Anywhere – Fits any standard plumbing connection. Unique design – no noisy pump, no external hoses. Installs near wall or free standing. Not a built-in, can be moved in future.

Saves Space and Improves Efficiency

Dental Table Features

In just minutes your Olympic Hi-Lo Wet Table can be converted into a fully equipped dental table. All your instruments and equipment are positioned at your fingertips, ready for faster, more efficient procedures.

Ergonomic Height Adjustment – You can work more comfortably seated or standing. Less tiring for long dental procedures.

Improved Presentation – Another benefit of height adjustment. Better visualization and access to the oral site.

Use Your Current And Future Equipment – This table is designed as a universal platform. You can use almost any dental unit or anesthesia machine.

Accessories – A choice of several helpful dental accessories currently available (next column).

Solid Work Surface – The heavy-duty construction of the Olympic Hi-Lo Wet Table provides a rigid platform for dental procedures.

Reduces Floor Clutter – Mounting equipment on the table saves floor space and congestion.

Swing Arms – For dental use, two Swing Arms are recommended. These articulating arms each have 2 drop-in sockets for your dental equipment and accessories. Each arm can support 60 lbs. The arms lift in/out of sockets on the lift column and can be quickly changed without tools.

Two Tables In One – The Olympic Hi-Lo Wet Table not only provides a superior wet-dry treatment table but also a fully equipped and efficient dental table.

For Olympic Hi-Lo Wet Table™

- ☐ **Rear Enclosure Panels for Island Installation of Wet Table #50989**
For Olympic Hi-Lo Wet Table™

Olympic Advanced Surgical Table™

Maximum Height – Better Presentation – The New Standard in Sterility

The only surgical table that places everything you need at your fingertips

Reduce fatigue and prevent repetitive stress injuries

Olympic's ergonomic design offers twice the height range of most tables. Lowers to an extra-short 29" and raises to an extra-tall 49" so now even the tallest doctor can operate comfortably. And micro-adjustments for better visualization have never been easier. There is even an adjustable arm rest and an integrated back table.

Everything you need is at your fingertips

The Olympic Advanced Surgical Table™ is as efficient as an airplane cockpit because all of your instruments and equipment are mounted on Swing Arms for perfect positioning – right where you want them. Each of the 4 floating Swing Arms can support up to 40 lbs of equipment and supplies – such as an IV Pole, Instrument Tray, Patient Monitor, Anesthesia Unit, Cautery Machine, Laptop, Limb Positioner...even a Floating Back Table. And the tool-free design allows you to reconfigure the table in seconds to meet your changing procedural needs.

Achieve a new standard in sterility

From top to bottom, the Olympic Advanced Surgical Table™ has been designed to help you achieve the highest level of sterility. Here you will find Olympic's Sterile-Max™ cleaning system, a full-visibility fluid channel that does not require taking any parts to the sink, protective covers over each of the foot switches, and a swing arm system that removes all those extra stands and casters from the floor. With fewer places for debris and lavage to hide, cleanup is now quicker, easier and more thorough.

At last...a safe and reliable, built-in warming solution

Olympic's Thermo-Safe™ table-top warming system provides controlled warming and a clear visual display for optimal patient comfort and thermoregulation. Unlike other warming systems that rely on a single thermostat, the Olympic warming system continuously monitors 6 thermostats on the patient surface to help ensure a patient's safety and comfort at all times.

Extra tall 49". Advanced Cleaning System. Floating Back Table.

Scan to watch video demonstration

or visit us at www.olyvet.com

A Surgical "Cockpit" – All your instruments and equipment are mounted on Swing Arms for perfect positioning. You save time and work in ergonomic comfort.

Swing Arms – Articulated. Support 40 lbs each. Change left/right without tools. Can be tightened into position.

Rock-Solid Operatory Surface – The heavy-duty construction eliminates all bounce and wobble, whether you are working on the side or end of the table.

Better Patient Presentation – The patient's position can be adjusted instantly during procedures using large paddles that are easily located under the drapes. No knobs to loosen. No breaking the sterile field.

- Height adjustment from 29" to an extra tall 49"
- Tilt adjustment up to 30°. V-positioner folds up to 45° and automatically locks

Large Table Top Surface – Full 57" length x 22" width for larger patients.

Fully Customizable – Swing Arms provide up to 8 sockets so table can be quickly customized to meet needs of each procedure. Mount any combination of IV Pole, Back Table, Instrument tray, Limb holder, Laptop or Patient Monitor, Anesthesia Unit.

Limb Holder – Locks rigidly into place in the X, Y and Z planes on either side of table.

Floating Back Table – Extra large v18" x 30" mayo tray that can be rigidly positioned over the patient or at foot or head of surgery table. Surface holds up to 25 lbs of instruments and equipment. Adjusts from table height to up to 13" above table. Easily adjusts with hand control.

Pivoting Arm Rest – For added comfort and stabilization during delicate procedures. Slide along track for easy adjustment.

Adjustable Cam Cleats – 2 on each side of table, slide along track for securing patients safely.

On Board Power Strip – Centralizes power needs in one place so there are fewer cords to work around. Cleaner. Safer. 120V/60Hz.

Thermo-Safe™ Patient Warming System – Table-top warming system assures a patient's comfort and safety at all times. Maximum temperature 95°.

Hospital Grade Casters – 3" locking casters for easy movement.

Cleaning Has Never Been Quicker Or More Efficient

All surfaces are clearly visible and easy to reach. Foot switches are shielded from splatter with protective covers. No more caster stands clustered around the table.

Advanced 6-sensor warming system

Keep patients warm and safe. Selected warming level continuously monitored for safety.

Floating Mayo Tray

Eliminates a clunky piece of extra equipment that is hard to clean. Height and forward position adjust easily.

Fully customizable in seconds

Add Olympic accessories or your preferred anesthesia unit, patient monitor or other ancillary equipment and supplies.

Reduce clutter

Integrated Power Strip centralizes all connections in one place so there are no cords collecting dirt on the floor.

- ☐ **Limb Holder #51882**

Olympic Versa-Lift™ with Quick-Lock™

The one electric lift for all your hospital's needs

New...Quick-Lock Model with Central Locking Brakes

Saves time and helps reduce lifting injuries

The Olympic Versa-Lift is as efficient as a Swiss Army Knife in adapting quickly to your changing procedural needs, transforming in seconds from a curbside medicine gurney to an exam table or treatment table. And it is so easy to navigate that a single operator can move patients from x-ray to surgery to recovery with ease.

The only table with drop-in accessories

The Versa-Lift includes 2 drop-in sockets that can accommodate an Olympic IV pole, Laptop/Monitor Tray or Instrument Tray so you can modify the table on the fly to meet your changing needs. There is also an optional headrest extender that increases the overall length of the table to an extra-long 62".

New Quick-Lock™ Model

The Versa-Lift is now available in 2 models. The standard Versa-Lift and the Quick-Lock™ model. Quick-Lock™ includes all the features of the standard model plus Central Locking Brakes, a second foot switch and a patient weight capacity of 300 lbs instead of 250 lbs.

Reduces disruption of compromised patients

The Versa-Lift comes with 2 removable stretchers – a soft stretcher perfect for cocooning anxious patients and a hard stretcher for holding larger patients or where immobilization is required. Both stretchers include 2 Velcro® tie-down straps. And because these stretchers come off the gurney, you lift the stretcher, not the patient, which is better for the patient and the caregiver.

A workhorse table that will never let you down

The Olympic Versa-Lift is a heavy-duty piece of equipment designed to meet you where you are, whether that means the parking lot, the operating room or anywhere else in your facility. This is not a timid gurney. Its husky chassis and hospital grade casters allow you to navigate speed bumps, curbs, potholes and thresholds while providing the smoothest possible ride to your patients. And the robust power system will provide you with up to 2 weeks of use on a single charge.

Safer for patients and staff

Curbside Transport

Move patients easily and quickly from car to clinic. Helps prevent back injuries when working alone.

Easy-roll gurney

Lightweight electric lift rolls easily over all outside surfaces. 300 lb weight capacity*. *Quick-Lock Version

Mobile exam and treatment table

A drop-in IV Pole, Instrument Tray and Laptop Tray. Quickly transform gurney into extra procedure table.

Lift the stretcher, not the patient

Safer. Helps prevent injuries. Perfect for transfers from the back of vehicles.

Versatile – The Olympic Versa-Lift will save you time and labor every day. This mobile electric lift combines three useful pieces of equipment for the price of one. Quickly pays for itself.

Patient transport – Easy to roll and steer. Light-weight – just 68 lbs, less than half the weight of most electric gurneys. Moves patient quickly from one department to another. Saves time.

Patient transfer – The lift-off stretcher makes transferring patients from the Versa-Lift to tables and cages faster and safer.

Treatment/Exam Table – The Versa-Lift is also a comfortable, height-adjustable treatment table that can be used anywhere needed. IV Pole and other accessories fit into sockets on table.

Protects against back injury – No more lifting heavy patients. The height adjusts from near floor to 40" with electric lift. Complies with ergonomic standards.

Curbside pick-up – The Versa-lift is sturdily built for outdoor use. The electric lift with removable stretcher makes extracting injured animals from cars easier, safer. Then just roll the patient into the hospital. For low-boy transport use pull-out handle.

Improves patient care – Compromised patients are no longer subjected to traumatic lifting and handling. Injured patients can be immobilized on the hard stretcher.

Full-range lift – Adjusts smoothly from near floor to 41". Capacity, 250 lbs (300 lbs for Quick-Lock model). Fast recharging and up to 2 weeks between charges.

Saves floor space – One piece of equipment with 3 functions: a curbside transport, an easy-roll gurney and an exam table.

2 Lift-off Stretchers

The removable Stretcher top is securely held by 4 posts but can be quickly lifted off for moving patients from the Versa-Lift to x-ray tables, cages or recovery mats. The 2-person stretcher prevents back strain, complies with safety standards. Speeds up patient handling. Two interchangeable stretchers are available.

Hard Stretcher

For transport and treatment of injured and other patients. Molded of reinforced polym... X-ray transparent. Non-slip surface. Wipes clean. Durable. 2 Velcro straps.

Soft Stretcher

For all patients. Fabric is medical-grade, anti-bacterial Herculite™. Strong aluminum frame. Wipes clean. X-ray transparent. 2 Velcro straps.

Olympic Fold-Up Gurney™

Saves space – Folding Gurney – Treatment Table

ROLLS

Scan to watch video demonstration

or visit us at www.olyvet.com

Features

Ideal for clinics with limited space – A transport gurney that folds out of the way and doubles as an exam-treatment table.

Folds and unfolds in seconds – To unfold, just spread the sides apart and an automatic safety lock holds it open. To close, release lock.

Rolls and steers easily – Large casters and steering handles at both ends. Turns on a dime.

Lightweight and strong – Weighs only 27 lbs but can carry 200 lbs. All welded construction.

Also a treatment table

When used with the Hard Top Stretcher, the Fold-Up becomes an exam-treatment table. Has firm, non-slip surface. Four locking casters.

FOLDS

Compact storage
Only 8 inches deep.
Always ready for use.

Safety Lock
Automatically locks when opened.

Lift-off Stretchers

Safer. Easier. Faster.

The top is a stretcher held securely on 4 posts but easily lifts off for transferring or lifting patients. This lift-off stretcher helps reduce back injury and makes moving patients safer and faster. Eliminates awkward handling of compromised patients.

2 Stretchers available

Soft Stretcher

Very light-weight. Plastic fabric is medical grade, anti-microbial Herculite®. Wipes clean. X-ray transparent. Strong aluminum frame. Fully welded. Feet under corners of frame provide knuckle clearance.

Hard Stretcher

Converts gurney into treatment table. Molded of reinforced polymer. Non-slip surface. Wipes clean. Hard surface helps immobilize injured patients. Fluids drain to port with integrated bucket hook.

Lift-off Stretchers

Safer. Easier. Faster.

The top is a stretcher held securely on 4 posts but easily lifts off for transferring or lifting patients. This lift-off stretcher helps reduce back injury and makes moving patients safer and faster. Eliminates awkward handling of compromised patients.

Features

Versatile – 3-way use Here is an easy-roll gurney that can speed up patient handling, and be used for exams and treatments. Plus, it's got extra room for storage.

Ultra lightweight gurney – Because this gurney weighs only 31 lbs—just a fraction of what other gurneys weigh—it rolls effortlessly on its 4 swiveling casters.

Steering handles at both ends – So one or two people can steer and make tight turns in crowded spaces, narrow hallways.

Have supplies – will travel – Also with this gurney supplies can travel with the patient, so whatever you need is always with you.

Larger patients – The Ultra-Lite Gurney is 52 inches long and can carry patients up to 250 lbs. Heavy-duty construction – all welded.

Exam-treatment table – When used with the Hard Stretcher top, the Ultra-Lite becomes a treatment table with a reinforced surface that is firm and non-slip.

Extra storage – The generous storage space can hold up to 100 lbs of supplies and equipment (in addition to patient load).

MRI compatible model – A non-ferrous model of the Ultra-Lite is available for use in MRI environments.

Olympic Elite Exam Lift Table™

New – more efficient exam room table

Saves time – Improves care – Patient friendly

**Modern look for
any exam room**

Improve Efficiency and Patient Care

The Olympic Elite Exam Lift Table improves patient care and saves time on every examination. The electric lift provides perfect patient presentation for large and small animals, and the patient can be raised or lowered during the exam for better visualization and minor treatment.

In addition to height adjustment, the free-standing Elite Exam Lift Table provides complete access to the patient from all 4 sides for more thorough exams.

The Olympic Elite Exam Lift Table is also patient friendly and helps reduce anxiety. The warm feeling Corian® top is non-slip and non-reflective, so your patients can stand comfortably and calmly during an exam.

And with the Olympic Elite Exam Lift Table you no longer have to lift a heavy patient risking injury for your staff. It complies with ergonomic standards. For added safety and cleanliness, the electric lift column is fully enclosed.

With its Corian® top, electric lift and enclosed column, the Olympic Elite Exam Lift Table makes every exam room more efficient and welcoming.

Accessories available

Choice of helpful
Accessories mounted
on Swing Arms, fit into
sockets. No tools required.

Adapts to Fit Your Changing Needs

The Olympic Elite Exam Lift Table is fully customizable for your procedural needs throughout the day. 2 sockets at the back of the table hold a sturdy 11"x20" Equipment Shelf with integrated hooks for stethoscope or clippers. 2 additional sockets can hold an Olympic IV Pole, LED Procedure Light, Swiveling Laptop/Monitor Tray or Instrument Tray. Because all accessories drop in to sockets, no tools are required to make changes.

For your exam room – Adjustable height – 360° patient access

Adjustable height

Better patient presentation for all patients large and small during any type of examination. Also, adjusts to comfortable standing or seated height for operator. Smooth, quiet electric lift has a capacity of 250 lbs. 2 foot switches, one on each side.

Full patient access

The Olympic Elite Exam Lift Table is free standing, not a built-in, so you have instant access to the patient from 4 sides for fast and thorough examinations. Saves time, improves patient care. Large **Corian®** surface, 54" x 22".

Corian® – patient friendly

The **Corian®** top is warmer feeling and non-slip – patients stand comfortably and calmly during exams. Also, non-reflective so they aren't spooked by mirror-images and lights. No clawing at table. (See **Corian®** below.)

No more lifting

With the Olympic Elite Exam Lift Table there is no more awkward lifting of heavy patients— and less likelihood of injuries for your staff. Large patients can walk on when the non-slip **Corian®** table is near floor level.

Fully enclosed

The electric lift is fully enclosed in a telescoping column. Safer when other pets or children are in the exam room. And cleaner, with no exposed machinery to collect hair. Faster clean-up.

Scale built-in – folds down

A precision scale is built in under the **Corian®** top. Scale has weight averaging, accuracy +/- 0.1 lb, lb/kg selection, large, easy-read numbers, and is swivel mounted for angle viewing. Lifetime accuracy guaranteed.

Modern, attractive

The Olympic Elite Exam Lift Table makes any exam room look more attractive. The handsome **Corian®** top and sleek enclosed column give it an impressive modern look. Makes your hospital environment more pleasing to owners, pets and your staff.

Corian® to match your décor

Corian® combines beauty with durability. It is the lifetime material that never ages from Dupont, not a thin laminate. Select from these standard color-patterns.

Additional Features

Casters – The Olympic Elite Exam Lift Table rolls on 4 locking casters. Easily positioned in exam room or moved for cleaning floor. Flexible for future hospital changes.

Rechargeable Battery – Operates either connected to wall outlet or on internal fast-recharge battery.

Power Strip – Convenient power strip with four 120V outlets is mounted just below table top at rear. Handy for clippers and other devices.

Olympic 3-in-1 Treatment Table™

A complete solution for all your weighing,
treatment and transport needs.

All-Purpose Table

- Transport
- Treatment
- Exam

Built-in Precision Scale – always at the ready

The Olympic 3-in-1 Treatment Table includes a precision scale that swivels and tilts so it is always at an optimal viewing angle. The self-calibrating scale maintains a +/- 0.1 lb accuracy – whether you are weighing a 250 lb pot belly pig or a 1 lb bird. And the weight averaging function locks in quickly, even on active patients. Also includes a 'last weight' recall button.

Customizes in seconds with 6 drop-in sockets

This work station is designed for efficiency and ergonomic comfort, standing or seated. All your instruments, monitors and other equipment are at your fingertips to save you time. And since all the accessories are mounted on the table, it eliminates floor clutter and saves space. Create the optimal workspace for each procedure with an Olympic IV Pole, Laptop Tray, Swiveling Instrument Tray, LED Procedure Light or Equipment Shelf.

Convenience Features

The 3-in-1 Treatment Station features an on-board power strip, 8 tie-down cleats, push handles, 2 foot switches and a long-life rechargeable battery.

Reduces handling of compromised patients

The Olympic 3-in-1 Treatment Table is designed to navigate easily from exam to treatment, x-ray, prep, surgery or recovery – and even outdoors. By combining patient treatment and transport, it reduces the handling of injured or compromised patients and saves time. The built-in scale is especially helpful when medications need to be administered and there is no time to use the floor scale.

Patient-friendly, non-slip Corian® tabletop

Table features an optional Corian® top, the ideal surface for modern hospitals. Corian feels warmer than stainless, is non-skid and non-reflective so patients are more relaxed during exams and treatment. Features anti-drip edge around perimeter.

Precision scale is built-in

Equipment Shelf

For monitors and other equipment. Easy to see and reach. Mounts at head of station. Electrical equipment connects directly to power outlets on table (see below).

Electrical Outlets

7 electric outlets for connecting all your accessories and equipment. Conveniently located at end of table near equipment shelf.

Laptop

Your laptop is securely held on a special swing arm so it's just where you want it. Can be quickly moved to any drop-in socket.

Instrument Tray

On swing arm. Fits any of the four drop-in sockets. Instruments always at your fingertips, raises and lowers with the table. 13" x 10".

Corian® non-slip surface

Table top surface is lifetime Corian® from DuPont, the ideal surface for modern hospitals. Feels warmer than stainless steel, is non-skid so your patients remain calm, wipes clean with disinfectants and features a drip edge. Choose from 3 standard colors/patterns.

IV Pole

Drops into sockets at corners of station. Eliminates floor stand. Travels with patient. Can support fluid warmer.

Procedure Light

Adjustable brightness and color temperature. Connects to electrical outlets on the 3-in-1 Treatment Table.

Scale

Scale under Corian® top. Large, easy to read. Swivel mounted. Can weigh active animals. Accuracy +/- 0.1 lb. Lifetime quality.

2 Foot Switches

For faster and convenient height adjustment, there are foot switches on both sides of the table.

For all procedures and transport to or from the surgical suite

Ergonomic and efficient

The 3-in-1 Treatment Table offers ergonomic comfort with full-range height adjustment, up to an extra tall 40". Work standing or seated. Improved patient presentation. The rechargeable electric lift is quiet, smooth and features two foot switches, one on each side.

Patient transport – multi-purpose

An easy-roll patient transport. It has steering handles and is light weight so it turns easily in tight spaces. Now you can seamlessly move patients between treatment, x-ray, prep, surgery, recovery.

Specifications

Dimensions – Overall 27" x 59",
Tabletop 23" x 53"

Height range – 12" to 40"

Olympic 2-in-1 Treatment Table™

A combination... Treatment Table and Easy-roll Gurney

Scan to watch video demonstration

or visit us at www.olyvet.com

This 2-in-1 Olympic Treatment Table is a convenient easy-roll gurney. You can use this table for treating and prepping and can also easily roll your patients to x-ray, surgery, recovery, or any area in your hospital – even outdoors. Unlike most treatment tables that are so heavy and hard to roll that they are practically stationary, the Olympic 2-in-1 Treatment Table rolls and steers easily. It's lightweight, has large casters, and a push bar.

For more efficient treatment, this Olympic table has an optional IV Pole, Laptop/Monitor Tray and an Instrument Tray that fit into sockets at the corners of the table. When the table is used for transport, the mounted accessories can quickly be removed or travel with the patient.

Easy-Roll Gurney Safer for patients and caregivers.

In addition, there are 2 foot switches, one on each side of the table. This saves time for you and your assistant. The rechargeable electric lift can be adjusted from near floor level to a tall 38" so you can work comfortably standing or seated.

This is the Treatment Table for the modern hospital. It's multi-purpose, offers useful accessories, and rolls easily wherever you need it.

Combination treatment table and easy-roll gurney

360° patient access

The Olympic 2-in-1 Treatment Table provides full access to the patient from 4 sides for fast and thorough examinations, and the large stainless steel surface includes 4 tie-down cleats on each side for restraint or positioning

Ergonomic comfort

The lightweight design, large hospital grade casters and comfortable push bar combine to make this table easy to navigate. And drop-in sockets allow for full customization so both a veterinarian and technician can work in complete comfort.

Adjustable height

Adjust from near-floor 12" height to a tall 38" so you can work seated or standing. Smooth, quiet electric lift. 250 lb weight capacity. 2 foot switches for convenience.

Customize with any combination of Olympic accessories

The Olympic 2-in-1 Treatment Table includes 4 drop-in sockets that support a choice of Olympic accessories including an IV Pole, Instrument Tray, Laptop Tray and LED Procedure Light.

All accessories can be removed for full 360° patient access and can be added at any time during an exam to transform the table into a full-service treatment table, minimizing patient stress.

Instrument Tray

On swing-arm. Fits sockets at 4 corners. Instruments always at your fingertips. 13" x 10".

Laptop Tray

Your laptop is securely held on a special swing-arm so it's just where you want it. Can be quickly moved to another drop-in socket.

LED Procedure Light

Adjustable brightness and focus. One-handed adjustability.

IV Pole

Drops into sockets. No tools required. Sturdy design holds IV bag and fluid pump. Bag holder aligns with long dimension of table so it will not bind on doorways.

Olympic Ultrasound Table™

The Ultimate Ultrasound Table

Work in greater comfort – Help reduce stress injuries

Save Time on Every Procedure

This is the first height adjustable table designed specifically for veterinary ultrasound. It incorporates several unique features to help improve imaging in any patient position – dorsal or lateral – and to enhance comfort for the operator and assistant.

With the electric lift you can adjust the table height for perfect presentation of both large and small animals and to minimize physical strain for the operator during long scans. Two adjustable gel pad armrests add to operator comfort.

A heavy-duty swing arm can support your portable ultrasound machine so you can position it at your fingertips to save time. Three probes can be conveniently stored on this same swing arm, and the arm pushes out of the way when you are setting up the patient.

The Olympic Ultrasound Table has two special cutouts in the transparent top that provide access for echocardiography, and the transparent top makes probe positioning easier and more certain. The cutouts have covers that can be used when smaller animals are positioned near the side of the table.

The Olympic Ultrasound Table saves time on every scan and reduces the threat of repetitive motion injury for the operator. It rolls easily where needed and will serve your growing ultrasound practice for years to come.

Echocardiograms

Two cutouts in the transparent top are specially designed for echocardiograms and other laterals. In this photo the patient is being set-up. The dog will be moved to the left so its thorax is over a cutout. The operator's arm is supported by an armrest while the assistant comfortably controls the patient. The operator can continuously adjust the table height with the foot switch for optimum position.

Efficient – Saves time – Better images

Cockpit efficiency

With adjustable patient height and your ultrasound machine at your fingertips, all scans are faster and less tiring. Ergonomic design helps prevent repetitive stress injuries for both the operator and the assistant.

Full-range height adjustment

No more lifting heavy patient to table height. Ideal presentation for large and small patients and all operators.

Covers for cutouts

Covers fit into cutouts to provide a solid surface. Note: small probe hole in the cover for scanning small animals. An additional cover fits small hole.

Armrests

Two gel pad armrests. Angle of each armrest can be adjusted to help reduce strain.

Swing Arm

Securely holds portable ultrasound machines up to 25 lbs. Arm swings 180° and platform swivels. Fits into socket on post.

Other features

Electric lift – A smooth, quiet, adjustable lift minimizing hand lifting, positions patient. Capacity 250 lbs.

Rolls easily – 4 locking casters permit this table to be moved when not in use or for room cleaning. It can also be fitted into rooms with different layouts and smaller spaces.

Sturdy construction – The solid, welded construction provides a safe and very steady platform for better scans. The Olympic Ultrasound Table is built to last for many years of daily use.

Storage space – The space under the top surface offers a large storage space for supplies, which are easy to see and reach.

Mat available (not shown) – To avoid pressure points during long lateral scans, a table-size, soft mat is available which has cutouts matching those in the table top. Wipes clean.

Dimensions – Top surface, 26" x 48".
