

Olympic Advanced Surgical Table™

Maximum Height – Better Presentation – The New Standard in Sterility
The only surgical table that places everything you need at your fingertips

Scan to watch video demonstration

IV Pole
Fits in sockets on Swing Arms.

Anesthesia Machine
Most popular models will mount on table. Reduces floor clutter.

Laptop/Monitor Tray
Keeps screen at optimal distance for easy viewing.

Visible Fluid Collection Channel
Wipes clean in-place with no parts to remove.

Large Height-Adjustable Instrument Tray
19" x 13"

Pivoting Arm Rest
Slides on rail for optimal positioning. Removable when not needed.

No More "Drape Diving"
Extra large paddles under the drape help assure easy adjustment of the table top without breaking the surgical field.

Integrated Power Outlet
All powered equipment can be controlled from one place.

Hospital Grade Casters
Table moves easily for cleaning.

2 Covered Foot Switches
Protective covers shield from splatter for easy cleaning.

Rises To An Extra Tall 49"

Reduce fatigue and prevent repetitive stress injuries

Olympic's ergonomic design offers twice the height range of most tables. Lowers to an extra-short 29" and raises to an extra-tall 49", so now even the tallest doctor can operate comfortably. And micro-adjustments for better visualization have never been easier. There is even an adjustable arm rest and an integrated back table.

Everything you need is at your fingertips

The Olympic Advanced Surgical Table is as efficient as an airplane cockpit because all of your instruments and equipment are mounted on Swing Arms for perfect positioning – right where you want them. Each of the 4 floating Swing Arms can support up to 40 lbs of equipment and supplies – such as an IV Pole, Instrument Tray, Patient Monitor, Anesthesia Unit, Cautery Machine, Laptop, Limb Positioner...even the Floating Mayo Tray. And the tool-free design allows you to reconfigure the table in seconds to meet your changing procedural needs.

Achieve a new standard in sterility

From top to bottom, the Olympic Advanced Surgical Table has been designed to help you achieve the highest level of sterility. Here you will find Olympic's full-visibility fluid channel that does not require taking any parts to the sink, protective covers over each of the foot switches, and a swing arm system that removes all those extra stands and casters from the floor. With fewer places for debris and lavage to hide, cleanup is now quicker, easier and more thorough.

At last...a safe and reliable, built-in warming solution

Olympic's Thermo-Safe™ table-top warming system provides controlled warming and a clear visual display for optimal patient comfort and thermoregulation. Unlike other warming systems that rely on a single thermostat, the Olympic warming system continuously monitors 6 thermostats on the patient surface to help ensure a patient's safety and comfort at all times.

Extra tall 49". Advanced Cleaning System. Integrated Back Table.

Cleaning Has Never Been Quicker Or More Efficient

All surfaces are clearly visible and easy to reach. Foot switches are shielded from splatter with protective covers. No more caster stands clustered around the table.

Advanced 6-sensor warming system

Keep patients warm and safe. Selected warming level continuously monitored for safety.

Floating Mayo Tray

Eliminates a clunky piece of extra equipment that is hard to clean. Height and forward position adjust easily.

A Surgical "Cockpit" – All your instruments and equipment are mounted on Swing Arms for perfect positioning. You save time and work in ergonomic comfort.

Swing Arms – Articulated. Support 40 lbs each. Change left/right without tools.

Rock-Solid Operatory Surface – The heavy-duty construction eliminates all bounce and wobble, whether you are working on the side or end of the table.

Better Patient Presentation – The patient's position can be adjusted instantly during procedures using large paddles that are easily located under the drapes. No knobs to loosen. No breaking the sterile field.

- Height adjustment from 29" to an extra tall 49"
- Tilt adjustment up to 30°. V-positioner folds up to 45° and automatically locks

Large Table Top Surface – Full 57" length x 22" width for larger patients.

Fully Customizable – Swing Arms provide up to 8 sockets so table can be quickly customized to meet needs of each procedure. Mount any combination of IV Pole, Back Table, Instrument tray, Limb holder, Laptop or Patient Monitor, Anesthesia Unit.

Limb Holder – Locks rigidly into place in the X, Y and Z planes on either side of table.

Floating Mayo Tray – Extra large 17" x 23" mayo tray that can be rigidly positioned over the patient or at foot or head of surgery table. Surface holds up to 25 lbs of instruments and equipment. Adjusts from table height to up to 13" above table. Easily adjusts with hand control.

Pivoting Arm Rest – For added comfort and stabilization during delicate procedures. Slide along track for easy adjustment.

Adjustable Cam Cleats – 2 on each side of table, slide along track for securing patients safely.

On Board Power Strip – Centralizes power needs in one place so there are fewer cords to work around. Cleaner. Safer. 120V/60Hz.

Thermo-Safe™ Patient Warming System – Table-top warming system assures a patient's comfort and safety at all times. Maximum temperature 95°.

Hospital Grade Casters – 3" locking casters for easy movement.

Fully customizable in seconds

Add Olympic accessories or your preferred anesthesia unit, patient monitor or other ancillary equipment and supplies.

Reduce clutter

Integrated Power Strip centralizes all connections in one place so there are no cords collecting dirt on the floor.

Order From Your Distributor
