Places all your equipment at your fingertips. Supports up to 60lbs.

Compressor Storage
Stores on table base behind lifting column.

On-Board Power Strip
All powered equipment can be plugged in. No more cords on floor.

Now Featuring
Integrated Thermo-Safe™ Warming System!

Foot Switch
Swivels. Always faces you.

Efficiency, Perfected... Save Time On Every Procedure

The key to improving efficiency and preventing repetitive stress injuries is positioning everything you need at your fingertips, so that you are never reaching awkwardly for controls or supplies. Only the Olympic Advanced Dental Table features floating swing arms that allow you to position your instrument tray, IV pole, patient monitor, anesthesia unit, procedure light, high-speed dental unit and laptop in the precise locations that match your body mechanics, minimizing strain on your arms, shoulders, neck and back. And because all your equipment is moving up and down as a single operator, you can now move from seated to standing with ease, either for ergonomic comfort or better patient visualization.

Finally... A Safe, Reliable, No-Fuss Warming System

The Olympic Advanced Dental Table is now available with our exclusive Thermo-Safe™ Warming System, a fear-free warming system. Unlike other warmers that rely on a single thermostat, the warming system continuously monitors 6 thermostats on the patient surface to help assure a patient's safety and comfort at all times, typically eliminating the need for under-patient warming.

Achieve A Higher Level of Sterility In Less Time

The Advanced Dental Table leaves your floor clean, accessible and caster-free. And with Olympic's new Sterile-Max™ Cleaning System, all fluids are collecting in a high-visibility channel that can be wiped down and disinfected in seconds, eliminating the need for a removable trough that requires an awkward trip to the sink.

Reduce Overall Construction Costs

The Olympic Advanced Dental Table can pay for itself on day one by reducing your square footage requirements. By integrating everything you need on the table's floating swing arms, you eliminate up to 7 wheeled stands from your operator, typically reducing your square footage requirement by 20-25 square feet. This can make the difference between fitting a second dental table in a room built for one, or being able to repurpose a small room as a new dental suite. Another way this table reduces construction costs is by eliminating the need for expensive overhead lighting. Olympic's integrated LED procedure lights provide all the light required with no installation costs.

All your dental equipment at your fingertips

STANDING
Extra tall 44"

SEATED
Comfortable 32"

Work in Ergonomic Comfort – Seated or Standing

Patient presentation can be adjusted instantly during procedures for better visualization. Electric lift adjusts from seated 32" to extra tall 44". Tilt adjustment up to 10°, V-positioner adjusts to 45°.

Mobile – Rolls easily for cleaning

Mounted on heavy duty 3" locking casters, so it can be moved for area cleaning. Just unplug one power cord and you can roll the entire operator.

Sterile-Max™ Cleaning System

All fluids are collected in a high-visibility channel that can be wiped down and disinfected in seconds.

Safe, Reliable Warming Solution

Olympic's Thermo-Safe™ warming system continuously monitors 6 thermostats on patient surface to ensure safety and comfort at all times. A dial control and clear display ensures easy adjustment.

Pre-Installed Sockets for Customization

Add Olympic accessories or your preferred anesthesia, dental unit, patient monitor, or other ancillary equipment.

Eliminate Need for Ceiling-Mounted Light

Choice of 3 LED procedure lights. Brightness up to 60k lux, dimming and color selectivity.

Dental Head Rest

Supports patient's head on reinforced stainless steel screen. Raised perimeter and internal screen wall keep caregiver dry, even when table is tilted.

Olympic Hi-Lo Wet Table™

Now...Work in Ergonomic Comfort – Seated or Standing
The Only Wet Table With Adjustable Height And Swing Arms

A Combination Wet Table and Dental Table That Converts In Minutes From One To The Other

All your instruments and equipment can be dropped into 6 sockets on the heavy-duty articulated swing arms. Whether you are positioned at the front of the table for a dental procedure or positioned on either side of the table for prepping, minor surgeries or other procedures, the swing arms can be pushed forward or backward to accommodate your needs. And the tool-free design means you can change out equipment on the fly. Olympic offers adapters for most brands of anesthesia equipment and dental delivery systems as well as a drop-in IV pole, instrument tray, laptop tray, patient monitor tray and LED lighting.

Saves Space and Improves Efficiency

Reduce fatigue and help prevent repetitive stress injuries

Olympic's ergonomic height-adjustable design allows the caregiver to work more comfortably seated or standing, reducing stress and strain during long procedures. Can be raised from an extra-low 32" to an extra-tall 44". Fully-enclosed electric lift is whisper quiet. Footswitch is mounted on a turntable so it's accessible from any side of the table.

Includes All Plumbing

Includes quick-connect hot and cold water lines, P-trap, high-arch faucet and heavy-duty spray hose and nozzle. No additional parts to purchase, arrives fully assembled.

Pre-Installed Mounting Sockets

Position up to 6 pieces of equipment on adjustable swing arms so everything you need is at your fingertips. Tool-free design means you can customize in seconds to meet your changing needs.

Eliminate Need for Ceiling-Mounted Light

Choice of 3 LED procedure lights. Brightness up to 60k lux, dimming and color selectivity. Wider positioning range than overhead lights.

Grates Can Be Tilted for Oral Drainage

Grate tilt insert installs under grates in seconds. The 5° tilt improves patient presentation and oral drainage.

Converts Instantly to a Dry Table

Stainless steel solid top with anti-drip edge. Installs in seconds over grates creating firm, dry surface for exams.

Reduce Clutter

Integrated Power Strip centralizes all electrical connections in one place so there are no cords on the floor.

Enclosed Electric Lift – Precision height adjustment. Patient capacity 250 lbs. Clean, fully enclosed.

Large Surface – 60"x 24", 2 removable grates.

Leveling Feet – Assure solid work surface.

Install Anywhere – Fits any standard plumbing connection. Unique design – no noisy pump, no external hoses. Installs near wall or free standing. Not a built-in, can be moved in future.

Solid Work Surface – The heavy-duty construction of the Olympic Hi-Lo Wet Table provides a rigid platform for dental procedures.

Olympic Advanced Surgical Table™

Maximum Height – Better Presentation – The New Standard in Sterility
The only surgical table that places everything you need at your fingertips

Reduce fatigue and prevent repetitive stress injuries

Olympic's ergonomic design offers twice the height range of most tables. Lowers to an extra-short 29" and raises to an extra-tall 49" so now even the tallest doctor can operate comfortably. And micro-adjustments for better visualization have never been easier. There is even an adjustable arm rest and an integrated back table.

Everything you need is at your fingertips

The Olympic Advanced Surgical Table is as efficient as an airplane cockpit because all of your instruments and equipment are mounted on Swing Arms for perfect positioning – right where you want them. Each of the 4 floating Swing Arms can support up to 40 lbs of equipment and supplies – such as an IV Pole, Instrument Tray, Patient Monitor, Anesthesia Unit, Cautery Machine, Laptop, Limb Holder...even a Floating Back Table. And the tool-free design allows you to reconfigure the table in seconds to meet your changing procedural needs.

Achieve a new standard in sterility

From top to bottom, the Olympic Advanced Surgical Table has been designed to help you achieve the highest level of sterility. Here you will find Olympic's Sterile-Max™ cleaning system, a full-visibility fluid channel that does not require taking any parts to the sink, protective covers over each of the foot switches, and a swing arm system that removes all those extra stands and casters from the floor. With fewer places for debris and lavage to hide, cleanup is now quicker, easier and more thorough.

At last...a safe and reliable, built-in warming solution

Olympic's Thermo-Safe™ table-top warming system provides controlled warming and a clear visual display for optimal patient comfort and thermoregulation. Unlike other warming systems that rely on a single thermostat, the warming system continuously monitors 6 thermostats on the patient surface to help ensure a patient's safety and comfort at all times.

Extra tall 49". Advanced Cleaning System. Floating Back Table.

Scan For More Info

A Surgical "Cockpit" – All your instruments and equipment are mounted on Swing Arms for perfect positioning. You save time and work in ergonomic comfort.

Swing Arms – Articulated. Support 40 lbs each. Change left/right without tools. Can be tightened into position.

Rock-Solid Operatory Surface – The heavy-duty construction eliminates all bounce and wobble, whether you are working on the side or end of the table.

Better Patient Presentation – The patient's position can be adjusted instantly during procedures using large paddles that are easily located under the drapes. No knobs to loosen. No breaking the sterile field.

- Height adjustment from 29" to an extra tall 49"
- Tilt adjustment up to 30°. V-positioner folds up to 45° and automatically locks

Large Table Top Surface – Full 57" length x 22" width for larger patients.

Fully Customizable – Swing Arms provide up to 8 sockets so table can be quickly customized to meet needs of each procedure. Mount any combination of IV Pole, Back Table, Instrument tray, Limb holder, Laptop or Patient Monitor, Anesthesia Unit.

Limb Holder – Locks into place on either side of table.

Floating Back Table – Extra large 30" x 18" tabletop that can be rigidly positioned over the patient or at foot or head of surgery table. Surface holds up to 25 lbs of instruments and equipment. Adjusts from table height to up to 13" above table. Easily adjusts with hand control.

Pivoting Arm Rest – For added comfort and stabilization during delicate procedures. Slide along track for easy adjustment.

Adjustable Cam Cleats – 2 on each side of table, slide along track for securing patients safely.

On Board Power Strip – Centralizes power needs in one place so there are fewer cords to work around. Cleaner. Safer. 120V/60Hz.

Thermo-Safe™ Patient Warming System – Table-top warming system assures a patient's comfort and safety at all times. Maximum temperature 99°.

Hospital Grade Casters – 3" locking casters for easy movement.

Advanced 6-sensor warming system

Keep patients warm and safe. Selected warming level continuously monitored for safety.

Floating Back Table

Eliminates a clunky piece of extra equipment that is hard to clean. Height and forward position adjust easily.

Fully customizable in seconds

Add Olympic accessories or your preferred anesthesia unit, patient monitor or other ancillary equipment and supplies.

Reduce clutter

Integrated Power Strip centralizes all connections in one place so there are no cords collecting dirt on the floor.

Cleaning Has Never Been Quicker Or More Efficient

All surfaces are clearly visible and easy to reach. Foot switches are shielded from splatter with protective covers. No more caster stands clustered around the table.

Helps Reduce Patient Stress

Until now there has been no seamless way to move compromised or critically ill patients through the surgical environment without significant physical disruption to the patient. With its onboard vital signs monitor, dedicated anesthesia unit (with 2 E-tanks) and IV pole for fluids administration, the Olympic Surgical Support Gurney is the all-in-one solution that can move each patient seamlessly from prep to surgery, from surgery to imaging and from imaging to recovery.

Helps Prevent Staff Injuries

The awkward transport of critically ill or interoperative patients is one of the primary sources of workplace injuries. These transfers require quick action, involve awkward navigation through crowded or obstructed hallways and often require pushing additional wheeled carts for IV fluids and anesthesia. With everything you need integrated into a single gurney, the Olympic Surgical Support Gurney makes for calmer, smoother and quicker transports. Moving

patients between surgery and x-ray imaging is a particular pain point in many hospitals. The Surgical Support Gurney nearly eliminates all lifting from this process, creating a seamless transfer platform for sliding the patient from one surface to the other. And challenging recoveries no longer require a technician to sit on the floor with the patient. The integrated post-surgical recovery bed allows staff to nestle up to the patient at a comfortable and safe height.

Saves Valuable Surgery Time

The integration of so many tools onto one transport gurney saves valuable minutes throughout the day. With its on-board precision scale, you can get an accurate weight at the push of a button whenever you want it, eliminating the awkward process of trying to catch a weight on a compromised or non-ambulatory patient. And because patients now arrive in the surgical suite connected to a transferable vital signs monitor, there is far less patient setup time.

Safer for the Patient and Caregiver

A Fully Mobile Solution
The Olympic Surgical Support Gurney is designed to move easily anywhere in your hospital and to accommodate patients up to 200 lbs.

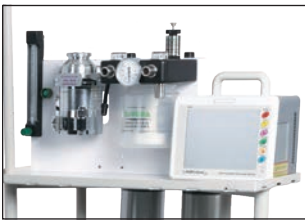

Transfer Patients Without Lifting
With or without the hard top stretcher, the Surgical Support Gurney facilitates smooth transfers to and from the surgical table.

Seamless Transfers to Imaging
The radiolucent hard top can be lifted up and slid onto the x-ray platform with no disruption in care.

Patient Recovery From A Comfortable Seated Height
Now you can lower the patient to a comfortable height and proceed with continuous monitoring and oxygen support.

Your Choice of Ancillary Equipment
Table accommodates Supera, Vetland and Versa Compact table-top model anesthesia units and most mid-size monitors.

Integrated Scale
Large, easy to read. Swivel mounted. Can weigh active animals. Accuracy ± 0.1 lb. Lifetime quality.

Hard Top Stretcher Retention Posts
Insert to hold the hard top firmly in place for transport. Twist out to release hard top.

2 Foot Switches
For faster and convenient height adjustment, there are two foot switches, one on each side of the table.

Integrated Power Strip
7 electric outlets for connecting all your accessories and equipment. Conveniently located at end of table near equipment shelf.

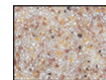

Corian® non-slip surface

Table top surface is lifetime Corian® from DuPont, the ideal surface for modern hospitals. Feels warmer than stainless steel, is non-skid so your patients remain calm, wipes clean with disinfectants and features a drip edge. Choose from 4 standard colors/patterns.

Olympic Versa-Lift™ with Quick-Lock™

The one electric lift for all your hospital's needs

New...Quick-Lock Model with Central Locking Brakes

Transport gurney

Treatment/Exam Table

Curbside Transport

Saves time and helps reduce lifting injuries

The Olympic Versa-Lift is as efficient as a Swiss Army Knife in adapting quickly to your changing procedural needs, transforming in seconds from a curbside medicine gurney to an exam table or treatment table. And it is so easy to navigate that a single operator can move patients from x-ray to surgery to recovery with ease.

The only table with drop-in accessories

The Versa-Lift includes 2 drop-in sockets that can accommodate an Olympic IV pole, Laptop/Monitor Tray or Instrument Tray so you can modify the table on the fly to meet your changing needs. There is also an optional headrest extender that increases the overall length of the table to an extra-long 62".

New Quick-Lock™ Model

The Versa-Lift is now available in 2 models: the standard Versa-Lift and the Quick-Lock™ model. Quick-Lock™ includes all the features of the standard model plus Central Locking Brakes, a second foot switch and a patient weight capacity of 300 lbs.

Reduces disruption of compromised patients

The Versa-Lift comes with 2 removable stretchers – a soft stretcher perfect for cocooning anxious patients and a hard stretcher for holding larger patients or where immobilization is required. Both stretchers include 2 Velcro® tie-down straps. And because these stretchers come off the gurney, you lift the stretcher, not the patient, which is better for the patient and the caregiver.

A workhorse table that will never let you down

The Olympic Versa-Lift is a heavy-duty piece of equipment designed to meet you where you are, whether that means the parking lot, the operating room or anywhere else in your facility. This is not a timid gurney. Its solid chassis and hospital grade casters allow you to navigate speed bumps, curbs, potholes and thresholds while providing the smoothest possible ride to your patients. And the robust power system will provide you with up to 2 weeks of use on a single charge.

Safer for patients and staff

Curbside Transport
Move patients easily and quickly from car to clinic. Helps prevent back injuries when working alone.

Easy-roll gurney
Lightweight electric lift rolls easily over all outside surfaces.

Mobile exam and treatment table
A drop-in IV Pole, Instrument Tray and Laptop Tray. Quickly transform gurney into extra procedure table.

Lift the stretcher, not the patient
Safer. Helps prevent injuries. Perfect for transfers from the back of vehicles.

Scan For More Info

Versatile – The Olympic Versa-Lift will save you time and labor every day. This mobile electric lift combines three useful pieces of equipment for the price of one. Quickly pays for itself.

Patient transport – Easy to roll and steer. Light-weight – just 68 lbs, less than half the weight of most electric gurneys. Moves patient quickly from one department to another. Saves time.

Patient transfer – The lift-off stretcher makes transferring patients from the Versa-Lift to tables and cages faster and safer.

Treatment/Exam Table – The Versa-Lift is also a comfortable, height-adjustable treatment table that can be used anywhere needed. IV Pole and other accessories fit into sockets on table.

Protects against back injury – No more lifting heavy patients. The height adjusts from 12" up to 41" with electric lift. Complies with ergonomic standards.

Curbside pick-up – The Versa-lift is sturdily built for outdoor use. The electric lift with removable stretcher makes extracting injured animals from cars easier, safer. Then just roll the patient into the hospital. For low-boy transport use pull-out handle.

Improves patient care – Compromised patients are no longer subjected to traumatic lifting and handling. Injured patients can be immobilized on the hard stretcher.

Full-range lift – Adjusts smoothly from near floor up to 41". Capacity, 250 lbs (300 lbs for Quick-Lock model). Fast recharging and up to 2 weeks between charges.

Saves floor space – One piece of equipment with 3 functions: a curbside transport, an easy-roll gurney and an exam table.

2 Lift-off Stretchers

The removable Stretcher top is securely held by 4 posts but can be quickly lifted off for moving patients from the Versa-Lift to x-ray tables, cages or recovery mats. The 2-person stretcher prevents back strain, complies with safety standards. Speeds up patient handling. Two interchangeable stretchers are available.

Hard Stretcher
For transport and treatment of injured and other patients. Molded of reinforced polymer. X-ray radiolucent. Non-slip surface. Wipes clean. Durable. 2 Velcro® straps.

Soft Stretcher
For all patients. Fabric is medical-grade, anti-bacterial Herculite™. Strong aluminum frame. Wipes clean. X-ray radiolucent. 2 Velcro® straps.

Olympic Fold-Up Gurney™

Saves space – Folding Gurney – Treatment Table

Lift-off Stretchers

The top is a stretcher held securely on 4 posts but easily lifts off for transferring or lifting patients, helps prevent back injuries and makes moving patients safer and faster. Eliminates awkward handling of compromised patients.

Treatment & Exam

When used with the Hard Top Stretcher, the Fold-Up becomes an exam/treatment table. Has firm, non-slip surface. Four locking casters.

STORES

Safety Lock

Durable pin automatically locks when gurney is opened. Easy release allows for quick and efficient storage.

Hard Stretcher

For transport and treatment of injured and other patients. Molded of reinforced polymer. X-ray radiolucent. Non-slip surface. Wipes clean. Durable. 2 Velcro® straps.

Soft Stretcher

For all patients. Fabric is medical-grade, anti-bacterial Herculite™. Strong aluminum frame. Wipes clean. X-ray radiolucent. 2 Velcro® straps.

Scan For More Info

Ideal for clinics with limited space – A transport gurney that folds out of the way and doubles as an exam-treatment table.

Folds and unfolds in seconds – To unfold, just spread the sides apart and an automatic safety lock holds it open. To close, release lock.

Rolls and steers easily – Large casters and steering handles at both ends. Turns on a dime.

Lightweight and strong – Weighs only 27 lbs but can carry 200 lbs. All welded construction.

Olympic Ultra-Lite Gurney™

Storage space and lift-off stretchers

2 Stretchers available

Hard Top and Soft Stretchers

Move patients to tables, cages, x-rays, recovery. Radiolucent.

Exam and Treatment

The Olympic Hard Top Stretcher converts the Ultra-Lite gurney into a treatment table. Provides a non-slip surface, a fluid drain port and an integrated bucket hook.

Transport

5 inch casters for smooth, controlled transport. Steering handles at both ends allow for tight turns in crowded spaces and narrow hallways.

Lift-off Stretchers. Safer. Easier. Faster.

The stretcher is held securely on 4 posts but easily lifts off for transferring or lifting patients. This lift-off stretcher helps reduce back injury and makes moving patients safer and faster. Eliminates awkward handling of compromised patients.

Versatile – An easy-roll gurney that can speed up patient transport, and be used for exams and treatments. Plus, it's got extra room for storage.

Ultra lightweight gurney – Because this gurney weighs only 31 lbs—just a fraction of what other gurneys weigh—it rolls effortlessly on its 4 large, swiveling casters.

Larger patients – The Ultra-Lite Gurney is 52 inches long and can carry patients up to 250 lbs. Heavy-duty construction.

Extra storage – The generous storage space can hold up to 100 lbs of supplies and equipment (in addition to patient load).

All-In-One Exam Room Solution

The Olympic Elite Folding Exam Station™ is a wall-mounted unit designed to replace all the cabinets and work surfaces in your exam room. With a built-in scale, two integrated power strips, a dedicated storage shelf and two swing arms that can hold up to four pieces of ancillary equipment, you can now work in ergonomic comfort with everything you need in front of you and at your fingertips. This means you will never again need to turn your back on a patient or client to take notes, reach for supplies, adjust your exam lighting, or hold a Olympic Hands-Free Woods Light. You'll also enjoy the convenience of integrated USB ports for keeping your laptop and phone well charged. And because everything in your exam room is off the floor, cleanup between procedures has never been easier or quicker.

Makes A Great First Impression

Your investment in the most advanced veterinary equipment and technologies often remains invisible to your clients, who rarely see beyond the exam room. This is where the Elite Folding Exam Station shines. On entering your new modern exam room, your clients will be greeted by the green glowing lights of the Olympic Sterility Indicator

System. This provides comforting assurance that the exam room has been thoroughly cleaned in preparation for their visit. Next, they will notice the minimalist styling, the sparkling white Corian surfaces, the on-board scale, integrated exam lighting and laptop station. This all speaks to your commitment of being at the vanguard of veterinary medicine.

Adaptive Technology That Evolves To Meet Your Needs

The Elite Folding Exam Station includes color-selectable LED ambient lighting that casts a welcoming light over the room and provides a great opportunity for your client to snap a memorable keepsake photo of their first visit to your hospital. This is a lifetime workstation designed to go with you through future remodels or moves. To adapt easily to your architectural plans, the Exam Station includes identical power strips and swing arm sockets on each side of the table. Our commitment to innovation does not stop with your initial equipment installation. As the future unfolds, Olympic will continue introducing new accessory integrations for your swing arm sockets and storage shelf.

Patients Are At-Ease on the Grippy, Non-Reflective Corian Surface
 The Folding Exam Station is suitable for patients up to 60 lbs. Tabletop surface measures 21" x 40".

Folds Away to Save Space
 The table folds down and stows against the wall when not in use.

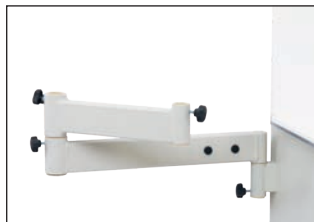

Accessories can be added and height-adjusted without tools
 Olympic accessories drop into sockets on the swing arms. Table can be used with or without accessories.

Storage Shelf
 The 21" x 11" storage shelf provides all the space you need for commonly-used supplies or equipment.

Folds Easily
 Gentle-Touch levers control gas struts that allow tabletop to fold down gently when not in use, while providing assistance when lifting into place.

Swing Arms for Olympic Accessories
 Double-socket swing arms are available to mount in the sockets on either side of the table. Each can hold up to 2 Olympic accessories.

Precision Digital Scale
 Built-in precision scale under the Corian® top. Scale has weight averaging, accuracy ± 0.1 lb, lb/kg selection, large, easy-read numbers. Lifetime accuracy guaranteed.

LED Color Selection Switch
 Table will glow Red when awaiting cleaning, Green when ready for next patient. Pink and Blue can be assigned to best meet hospital's communication needs.

RED = Wait for Cleaning

GREEN = Ready for Patient

The exam room can be cast in a gentle light to indicate state of sterility or to satisfy the preferences of caregivers or clients.

Olympic Elite Exam Lift Table™

New – more efficient exam room table

Saves time – Improves care – Patient friendly

Modern look for any exam room

Improve Patient Comfort and Access

The warm feeling Corian® top is non-slip and non-reflective, so your patients can stand comfortably and calmly during an exam. Because Corian® reads like flooring material to most patients, there is less hesitation in stepping onto the table top. And the quiet, smooth lift mechanism makes it easy to adjust to any height without startling the patient. This table can be set up in the middle of a room with 360° patient access or pushed against any wall. Plug in or operate cord-free on battery power.

Adapts to Fit Your Changing Needs

The Olympic Elite Exam Lift Table is fully customizable for your procedural needs throughout the day. 2 drop-in sockets at the back of the table hold a sturdy 11"x20" Equipment Shelf with integrated hooks for stethoscope or clippers. 2 additional sockets can hold an Olympic IV Pole, LED Procedure Light, Instrument Tray, Swiveling Laptop Tray or a Patient Monitor Tray. Because all accessories drop into sockets, no tools are required to make changes.

For your exam room – Adjustable height – 360° patient access

Adjustable height

Better patient presentation for all patients large and small during any type of examination. Also, adjusts to comfortable standing or seated height for operator. Smooth, quiet electric lift has a capacity of 250 lbs. 2 foot switches, one on each side.

Full patient access

The Olympic Elite Exam Lift Table is free standing, not a built-in, so you have instant access to the patient from 4 sides for fast and thorough examinations. Saves time, improves patient care. Large Corian® surface, 54" x 22".

Corian® – patient friendly

The Corian® top is warmer feeling and non-slip – patients stand comfortably and calmly during exams. Also, non-reflective so they aren't spooked by mirror-images and lights. No clawing at table. (See Corian® below.)

No more lifting

With the Olympic Elite Exam Lift Table there is no more awkward lifting of heavy patients— and less likelihood of injuries for your staff. Large patients can walk on when the non-slip Corian® table is near floor level.

Fully enclosed

The electric lift is fully enclosed in a telescoping column. Safer when other pets or children are in the exam room. And cleaner, with no exposed machinery to collect hair. Faster clean-up.

Scale built-in – folds down

A precision scale is built in under the Corian® top. Scale has weight averaging, accuracy +/- 0.1 lb, lb/kg selection, large, easy-read numbers, and is swivel mounted for angle viewing. Lifetime accuracy guaranteed.

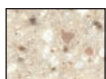

Modern, attractive

The Olympic Elite Exam Lift Table makes any exam room look more attractive. The handsome Corian® top and sleek enclosed column creates an impressive modern look. Makes your hospital environment more pleasing to caregivers, clients and patients.

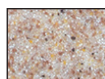

Corian® to match your décor

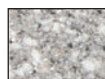

Corian® combines beauty with durability. It is the lifetime material from Dupont that never ages. Select from these standard color-patterns.

Olympic Advanced Treatment Station™

A complete solution for all your weighing,
treatment and transport needs.

Built-in Precision Scale – always at the ready

The Olympic Advanced Treatment Station includes a precision scale that swivels and tilts so it is always at an optimal viewing angle. The self-calibrating scale maintains a ± 0.1 lb accuracy – whether you are weighing a 250 lb pot belly pig or a 1 lb bird. And the weight averaging function locks in quickly, even on active patients. Also includes a 'last weight' recall button.

Customizes in seconds with 6 drop-in sockets

This work station is designed for efficiency and ergonomic comfort, standing or seated. All your instruments, monitors and other equipment are at your fingertips to save you time. And since all the accessories are mounted on the table, it eliminates floor clutter and saves space. Create the optimal workspace for each procedure with an Olympic IV Pole, Laptop Tray, Patient Monitor Tray, Swiveling Instrument Tray, LED Procedure Light or Equipment Shelf.

Convenience Features

The Advanced Treatment Station features an on-board power strip, 8 tie-down cleats, push handles, 2 foot switches and a long-life rechargeable battery.

Reduces handling of compromised patients

The Olympic Advanced Treatment Station is designed to navigate easily from exam to treatment, x-ray, prep, surgery or recovery – and even outdoors. By combining patient treatment and transport, it reduces the handling of injured or compromised patients and saves time. The built-in scale is especially helpful when medications need to be administered and there is no time to use the floor scale.

Patient-friendly, non-slip Corian® tabletop

Table features an optional Corian® top, the ideal surface for modern hospitals. Corian feels warmer than stainless, is non-skid and non-reflective so patients are more relaxed during exams and treatment. Features anti-drip edge around perimeter.

Precision scale is built-in

Equipment Shelf
For monitors and other equipment. Easy to see and reach. Mounts at head of station. Electrical equipment connects directly to power outlets on table (see below).

Integrated Scale
Large, easy to read. Swivel mounted. Can weigh active animals. Accuracy ± 0.1 lb. Lifetime quality.

Electrical Outlets
7 electric outlets for connecting all your accessories and equipment. Conveniently located at end of table near equipment shelf.

Procedure Light
Adjustable brightness and color temperature. Connects to electrical outlets on the Advanced Treatment Station.

Swiveling Laptop Tray
Your laptop is securely held on a special swing arm so it's just where you want it. Can be quickly moved to any drop-in socket.

2 Foot Switches
For faster and convenient height adjustment, there are foot switches on both sides of the table.

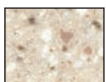

Instrument Tray
On swing arm. Fits any of the four drop-in sockets. Instruments always at your fingertips, raises and lowers with the table. 13" x 10".

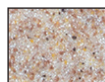

Corian® non-slip surface

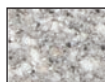

Table top surface is lifetime Corian® from DuPont, the ideal surface for modern hospitals. Feels warmer than stainless steel, is non-skid so your patients remain calm, wipes clean with disinfectants and features a drip edge. Choose from 4 standard colors/patterns.

For all procedures and transport to or from the surgical suite

Ergonomic and efficient
The Advanced Treatment Station offers ergonomic comfort with full-range height adjustment, up to an extra tall 40". Work standing or seated. Improved patient presentation. The rechargeable electric lift is quiet, smooth and features two foot switches, one on each side.

Patient transport – multi-purpose
An easy-roll patient transport. It has steering handles and is light weight so it turns easily in tight spaces. Now you can seamlessly move patients between treatment, x-ray, prep, surgery, recovery.

Olympic 2-in-1 Treatment Table™

A combination... Treatment Table and Easy-roll Gurney

Treatment and Transport For The Modern Hospital

This 2-in-1 Olympic Treatment Table is a convenient easy-roll gurney. You can use this table for treating and prepping and can also easily roll your patients to x-ray, surgery, recovery, or any area in your hospital – even outdoors. Unlike most treatment tables that are so heavy and hard to roll that they are practically stationary, the Olympic 2-in-1 Treatment Table rolls and steers easily. It's lightweight, has large casters, and a push bar.

For more efficient treatment, this Olympic table has an optional IV Pole, Laptop Tray, Patient Monitor Tray and an Instrument Tray that fit into sockets at the corners of the table. When the table is used for transport, the mounted accessories can quickly be removed or travel with the patient.

Easy-Roll Gurney Safer for patients and caregivers.

In addition, there are 2 foot switches, one on each side of the table. This saves time for you and your assistant. The rechargeable electric lift can be adjusted from near floor level to a tall 38" so you can work comfortably standing or seated.

This is the Treatment Table for the modern hospital. It's multi-purpose, offers useful accessories, and rolls easily wherever you need it.

Combination treatment table and easy-roll gurney

360° patient access

The Olympic 2-in-1 Treatment Table provides full access to the patient from 4 sides for fast and thorough examinations, and the large stainless steel surface includes 4 tie-down cleats on each side for restraint or positioning

Ergonomic comfort

The lightweight design, large hospital grade casters and comfortable push bar combine to make this table easy to navigate. And drop-in sockets allow for full customization so both a veterinarian and technician can work in complete comfort.

Adjustable height

Adjust from near-floor 12" height to a tall 38" so you can work seated or standing. Smooth, quiet electric lift. 250 lb weight capacity. 2 foot switches for convenience.

Customize with any combination of Olympic accessories

The Olympic 2-in-1 Treatment Table includes 4 drop-in sockets that support a choice of Olympic accessories including an IV Pole, Instrument Tray, Laptop Tray and LED Procedure Light.

All accessories can be removed for full 360° patient access and can be added at any time during an exam to transform the table into a full-service treatment table, minimizing patient stress.

Scan For More Info

Instrument Tray

On swing-arm. Fits sockets at 4 corners. Instruments always at your fingertips. 13" x 10".

Laptop Tray

Your laptop is securely held on a special swing-arm so it's just where you want it. Can be quickly moved to another drop-in socket.

LED Procedure Light

Adjustable brightness and focus. One-handed adjustability.

IV Pole

Drops into sockets. No tools required. Sturdy design holds IV bag and fluid pump. Bag holder aligns with long dimension of table so it will not bind on doorways.

Olympic Ultrasound Table™

The Ultimate Ultrasound Table...Now With a Choice of Two Table Tops

Work in greater comfort – Help reduce stress injuries

Save Time on Every Procedure

This is the first height adjustable table designed specifically for veterinary ultrasound. It incorporates several unique features to help improve imaging in any patient position—dorsal or lateral—and to enhance comfort for the operator and assistant.

With the electric lift you can adjust the table height for perfect presentation of both large and small animals and to minimize physical strain for the operator during long scans. Two adjustable gel pad armrests add to operator comfort.

A heavy-duty swing arm can support your portable ultrasound machine so you can position it at your fingertips to save time. Three probes can be conveniently stored on this same swing arm, and the arm pushes out of the way when you are setting up the patient.

The Olympic Ultrasound Table has two special cutouts in the transparent top that provide access for echocardiography, and the

transparent top makes probe positioning easier and more certain. The cutouts have covers that can be used when smaller animals are positioned near the side of the table.

The Olympic Ultrasound Table saves time on every scan and reduces the threat of repetitive motion injury for the operator. It rolls easily where needed and will serve your growing ultrasound practice for years to come.

Echocardiograms

Two cutouts in the transparent top are specially designed for echocardiograms. In this photo the patient is being set-up. The dog will be moved to the left so its thorax is over a cutout. The operator's arm is supported by an armrest while the assistant comfortably controls the patient. The operator can continuously adjust the table height with the foot switch for optimum position.

Efficient – Saves time – Better images

Maximum Comfort for Both Ultrasonographer and Technician
Ergonomic design helps prevent repetitive stress injuries for both the operator and the assistant.

Model US-1 Pictured

Scan For More Info

Covers for cutouts

Covers fit into cutouts to provide a solid surface. Note: small probe hole in the center for scanning small animals. An additional cover fits small hole.

Armrests

Two gel pad armrests. Angle of each armrest can be adjusted to help reduce strain.

Swing Arm

Securely holds portable ultrasound machines up to 25 lbs. Arm swings 180° and platform swivels. Fits into socket on post.

Other features

Electric lift – A smooth, quiet, adjustable lift minimizing hand lifting, positions patient. Capacity 250 lbs. Tabletop height adjusts from 22" up to 48".

Rolls easily – 4 locking casters permit table to be moved when not in use or for room cleaning. It can also be fitted into rooms with different layouts and smaller spaces.

Sturdy construction – The solid, welded construction provides a safe and steady platform for better scans.

Storage space – The space under the top surface offers a large storage area for supplies, which are easy to see and reach.
