Now available
with an Integrated
Precision Scale!

Saves Time and Helps Reduce Lifting Injuries

The Olympic Versa-Lift is as efficient as a Swiss Army Knife in adapting quickly to your changing procedural needs, transforming in seconds from a curbside medicine gurney to an exam table or treatment table. And it is so easy to navigate that a single operator can move patients from x-ray to surgery to recovery with ease.

The Only Table With Drop-In Accessories

The Versa-Lift includes 2 drop-in sockets (4 sockets on the Quick-Lock with Scale) that can accommodate an Olympic IV pole, Laptop/Monitor Tray or Instrument Tray so you can modify the table on the fly to meet your changing needs. There is also an optional headrest extender that increases the overall length of the table to an extra-long 62".

New Quick-Lock™ Model

The Versa-Lift is now available in 3 models: the Standard, Quick-Lock™, and the Quick-Lock™ with Scale. Both Quick-Lock™ models include all the features of the standard model plus Central Locking Brakes, a second foot switch and a patient weight capacity of 300 lbs.

Reduces Disruption of Compromised Patients

The Versa-Lift Quick-Lock includes 2 removable stretchers – a soft stretcher perfect for cocooning anxious patients and a hard stretcher for holding larger patients or where immobilization is required. The Soft Stretcher is optional on the Standard Versa-Lift. Both stretchers include 2 Velcro® tie-down straps. And because these stretchers come off the gurney, you lift the stretcher, not the patient, which is better for the patient and the caregiver.

A Workhorse Table That Will Never Let You Down

The Olympic Versa-Lift is a heavy-duty piece of equipment designed to meet you where you are, whether that means the parking lot, the operating room or anywhere else in your facility. This is not a timid gurney. Its solid chassis and hospital grade casters allow you to navigate speed bumps, curbs, potholes and thresholds while providing the smoothest possible ride to your patients. And the robust power system will provide you with up to 2 weeks of use on a single charge.

Safer for Patients and Staff

Mobile Exam and Treatment Table

A drop-in IV Pole, Instrument Tray and Laptop Tray. Quickly transform gurney into extra procedure table.

Lift the Stretcher, Not the Patient

Safer. Helps prevent injuries. Perfect for transfers from the back of vehicles.

Versatile – The Olympic Versa-Lift will save you time and labor every day. This mobile electric lift combines three useful pieces of equipment for the price of one. Quickly pays for itself.

Patient transport – Easy to roll and steer. Lightweight—just 68 lbs for Standard model, 85 lbs for Quick-Lock—less than half the weight of most electric gurneys. Moves patient quickly from one department to another. Saves time.

Patient transfer – The lift-off stretcher makes transferring patients from the Versa-Lift to tables and cages faster and safer.

Treatment/Exam Table – The Versa-Lift is also a comfortable, height-adjustable treatment table that can be used anywhere needed. IV Pole and other accessories fit into sockets on table.

Protects against back injury – No more lifting heavy patients. The height adjusts from 12" up to 41" with electric lift. Complies with ergonomic standards.

Curbside pick-up – The Versa-Lift is sturdily built for outdoor use. The electric lift with removable stretcher makes extracting injured animals from cars easier, safer. Then just roll the patient into the hospital. For low-boy transport use pull-out handle.

Improves patient care – Compromised patients are no longer subjected to traumatic lifting and handling. Injured patients can be immobilized on the hard stretcher.

Full-range lift – Adjusts smoothly from near floor up to 41". Capacity, 250 lbs (300 lbs for Quick-Lock models). Fast recharging and up to 2 weeks between charges.

Saves floor space – One piece of equipment with 3 functions: a curbside transport, an easy-roll gurney and an exam table.

Precision Digital Scale

Bright LED screen with large, easy-to-read numbers. Accuracy ± 0.1 lb with weight averaging, Easy to calibrate. Can lock to KG or LB display mode.

2 Lift-Off Stretchers

The removable Stretcher top is securely held by 4 posts but can be quickly lifted off for moving patients from the Versa-Lift to x-ray tables, cages or recovery mats. The 2-person stretcher prevents back strain, complies with safety standards. Speeds up patient handling.

Hard Stretcher
Molded of reinforced polymer. X-ray radiolucent. Non-slip surface. Wipes clean. Durable. 2 Velcro® straps.

Soft Stretcher
Fabric is medical-grade, anti-bacterial Herculite™. Strong aluminum frame. Wipes clean. X-ray radiolucent. 2 Velcro® straps.
