

# Olympic Advanced Surgical Table™

## Soft Tissue – Orthopedics – Complex Surgeries

*Reinventing What Is Possible for the Modern Surgical Suite*

### Expanded Height Range for Greater Ergonomic Comfort

The Olympic Advanced Surgical Table enables the user to lower the tabletop to an extra short 29" or raise it to an extra tall 49". This is a full 6" taller and 6" shorter than most tables, assuring that every user can operate in ergonomic comfort, whether seated or standing. The expanded height range also offers the surgeon better visualization of the surgical site.

### Greater Flexibility with Quick-Connect Accessories

The Advanced Surgical Table comes standard with 4 swing arm sockets pre-installed on the central column (vs. 2 on the Precision Model), allowing for the integration of up to 8 accessories for increased freedom of movement around the table.

### Extra Weight Capacity for Even the Largest Patients

The Advanced Surgical Table uses a state-of-the-art electric lift that provides 50 lbs of additional patient weight capacity, raising the patient weight limit to 275 lbs, assuring you can accommodate even the largest patients. And you can load up to 40 lbs of surgical support accessories on each swing arm compared to 30 lbs on the Precision model.

### Advanced Styling for Ease of Movement and Cleaning

The sleek styling of this table is designed to facilitate easier movement around the table and reduce cleaning time between procedures.

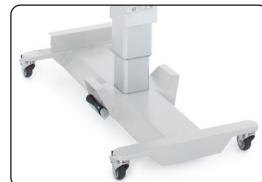

**Expanded Height Range 29"-49"**

**275 lb Patient Weight Capacity**

**2 Column-Mounted Sockets**

**Contoured Base for Easy Cleaning**
