# Olympic Advanced Dental Table™

Now Featuring  
**Integrated Thermo-Safe™  
Warming System!**  
(Optional)

## Cleaning Has Never Been Quicker or More Efficient

With Olympic's Easy-Clean™ Design, all surfaces are clearly visible and easy to reach. Foot switches are shielded from splatter with protective covers. No more caster stands cluttering the dental suite.

Patent No. US 12,285,315 B2

## Efficiency, Perfected... Save Time On Every Procedure

The key to improving efficiency and preventing repetitive strain injuries is positioning everything you need at your fingertips, so that you are never reaching awkwardly for controls or supplies. Only the Olympic Advanced Dental Table features floating swing arms that allow you to position your instrument tray, IV pole, patient monitor, anesthesia unit, procedure light, high-speed dental unit and laptop in the precise locations that match your body mechanics, minimizing strain on your arms, shoulders, neck and back. And because all your equipment is moving up and down as a single operator, you can now move from seated to standing with ease, either for ergonomic comfort or better patient visualization.

## Finally... A Safe, Reliable, No-Fuss Warming System

The Olympic Advanced Dental Table is now available with our exclusive Thermo-Safe™ Warming System. Unlike other warmers that rely on a single thermostat, this warming system continuously monitors 6 sensors on the patient surface to help assure a patient's safety and comfort at all times, typically eliminating the need for under-patient warming.

## Designed to Boost Disinfection Standards

The Advanced Dental Table leaves your floor clean, accessible and caster-free. And with Olympic's new Easy-Clean™ Design, all fluids are collected in a high-visibility channel that can be wiped down and disinfected in seconds, eliminating the need for a removable tray that requires an awkward trip to the sink.

## Reduce Overall Construction Costs

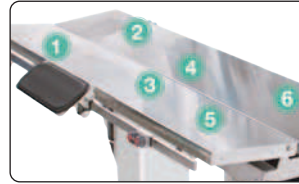

The Olympic Advanced Dental Table can pay for itself on day one by reducing your square footage requirements. By integrating everything you need on the table's floating swing arms, you eliminate up to 6 wheeled stands from your operator, typically reducing your square footage requirement by 20–30 square feet. This can make the difference between fitting a second dental table in a room built for one, or being able to repurpose a small room as a new dental suite. Another way this table reduces construction costs is by eliminating the need for expensive overhead lighting. Olympic's integrated LED procedure lights provide all the light required for dentistry with no installation costs.

# All Your Dental Equipment At Your Fingertips

## Pre-Installed Sockets

Just add Olympic swing arms and you can mount your preferred anesthesia unit, dental unit, patient monitor, or other Olympic accessories.

## Safe, Reliable Warming Solution

Olympic's Thermo-Safe™ warming system continuously monitors 6 locations on patient surface to ensure safety and comfort at all times. A dial control and clear display ensures easy adjustment.

## Eliminate Need for Ceiling-Mounted Light

Choice of 3 LED procedure lights. Brightness up to 60k lux, dimming and color selectivity. Wider positioning range than overhead lights.

## Dental Head Rest

Supports patient's head on reinforced stainless steel screen. Raised perimeter and internal screen wall keeps caregiver dry, even when table is tilted.

## Reduce Clutter

Integrated Power Strip centralizes all electrical connections in one place so there are no cords on the floor.

# Save Up To \$10,000 on the Cost of A New Dental Suite

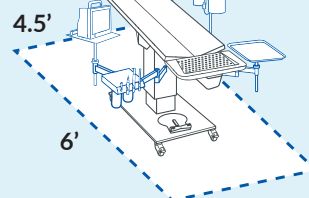

**Save \$3,000 – \$3,500**  
Compared to Overhead Lighting

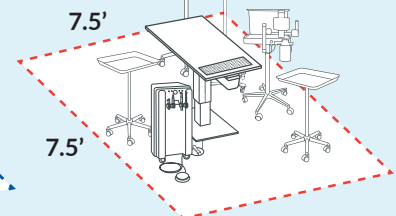

Olympic's SoloMax LED Procedure Light eliminates need for installing overhead lighting.

**Save \$7,500 – \$10,000**  
By using less space

Olympic Dental Suite Footprint

Traditional Dental Suite Footprint

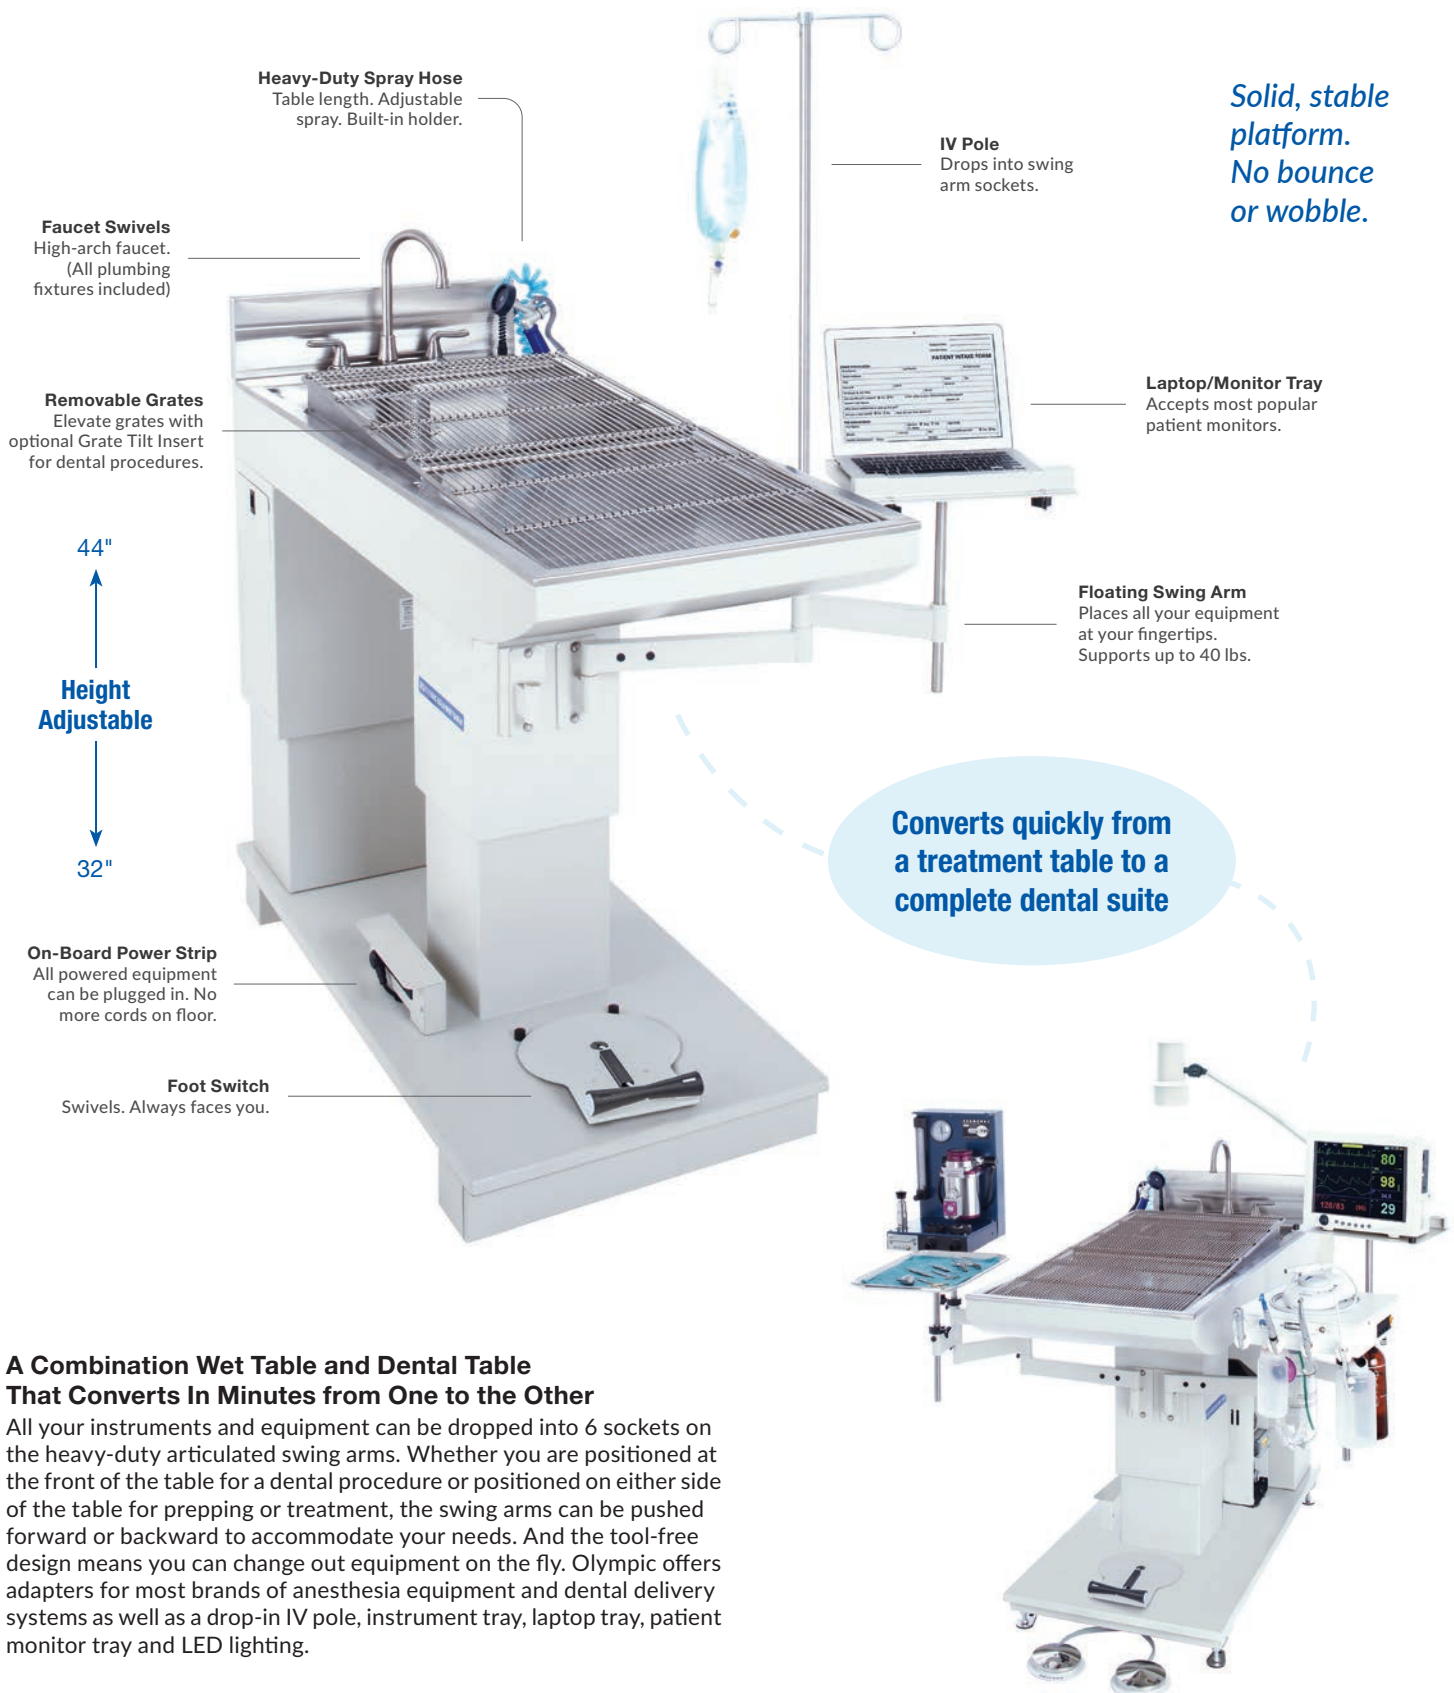

A conventional dental suite requires the placement of 5 to 7 wheeled accessory carts around a central table. By integrating all these accessories onto its swing arms, an Olympic Advanced Dental Table or Olympic Hi-Lo Wet Table reduces the space required for a dental suite by 20 to 30 square feet.

# Olympic Hi-Lo Wet Table™

**Now...Work in Ergonomic Comfort – Seated or Standing**  
*The Only Wet Table With Both Adjustable Height And Swing Arms*

## **A Combination Wet Table and Dental Table That Converts In Minutes from One to the Other**

All your instruments and equipment can be dropped into 6 sockets on the heavy-duty articulated swing arms. Whether you are positioned at the front of the table for a dental procedure or positioned on either side of the table for prepping or treatment, the swing arms can be pushed forward or backward to accommodate your needs. And the tool-free design means you can change out equipment on the fly. Olympic offers adapters for most brands of anesthesia equipment and dental delivery systems as well as a drop-in IV pole, instrument tray, laptop tray, patient monitor tray and LED lighting.

# Saves Space and Improves Efficiency

## Reduce Fatigue and Help Prevent Repetitive Strain Injuries

Olympic's ergonomic height-adjustable design allows the caregiver to work more comfortably seated or standing, reducing stress and strain during long procedures. Can be raised from an extra-low 32" to an extra-tall 44". Fully-enclosed electric lift is whisper quiet. Foot switch is mounted on a turntable so it's accessible from any side of the table.

### Includes All Plumbing

Includes quick-connect hot and cold water lines, P-trap, high-arch faucet and heavy-duty coiled hose and nozzle. No additional parts to purchase, arrives fully assembled.

### Pre-Installed Mounting Sockets

Position up to 6 pieces of equipment on adjustable swing arms so everything you need is at your fingertips. Tool-free design means you can customize in seconds to meet your changing needs.

### Eliminate Need for Ceiling-Mounted Light

Choice of 3 LED procedure lights. Brightness up to 60k lux, dimming and color selectivity. Wider positioning range than overhead lights.

### Grates can be Tilted for Increased Oral Drainage

Grate tilt insert installs under grates in seconds. The 5° tilt improves patient presentation and oral drainage.

### Converts Instantly to a Dry Table

Stainless steel solid top with anti-drip edge. Installs in seconds over grates to create a firm, dry surface for exams.

### Reduce Clutter

Integrated Power Strip centralizes all electrical connections in one place so there are no cords on the floor.

**Enclosed electric lift** – Precision height adjustment. Patient capacity 250 lbs. Clean, fully enclosed.

**Large surface** – 60"x 24", 2 removable grates.

**Leveling feet** – Assure solid work surface.

**Install anywhere** – Fits any standard plumbing connection. Unique design – no noisy pump, no external hoses. Installs near wall or free standing. Not a built-in, can be moved in future.

**Solid work surface** – The heavy-duty construction of the Olympic Hi-Lo Wet Table provides a rigid platform for dental procedures.

# Design Your Own Olympic Table

## How To Use This Guide

- 1 Select a Base Table
- 2 Add Your Preferred Accessories
- 3 Contact Us for a Same-Day Quote

Each Olympic Dental Table, Wet Table or Surgical Table features Olympic's unique Quick-Connect accessory system so you can customize a table to meet your needs...and modify it in seconds as your needs change. Tools are never required and the configuration possibilities are endless.

## Design a Dental Suite

### Choose Your Dental Table

#### Olympic Advanced Dental Table

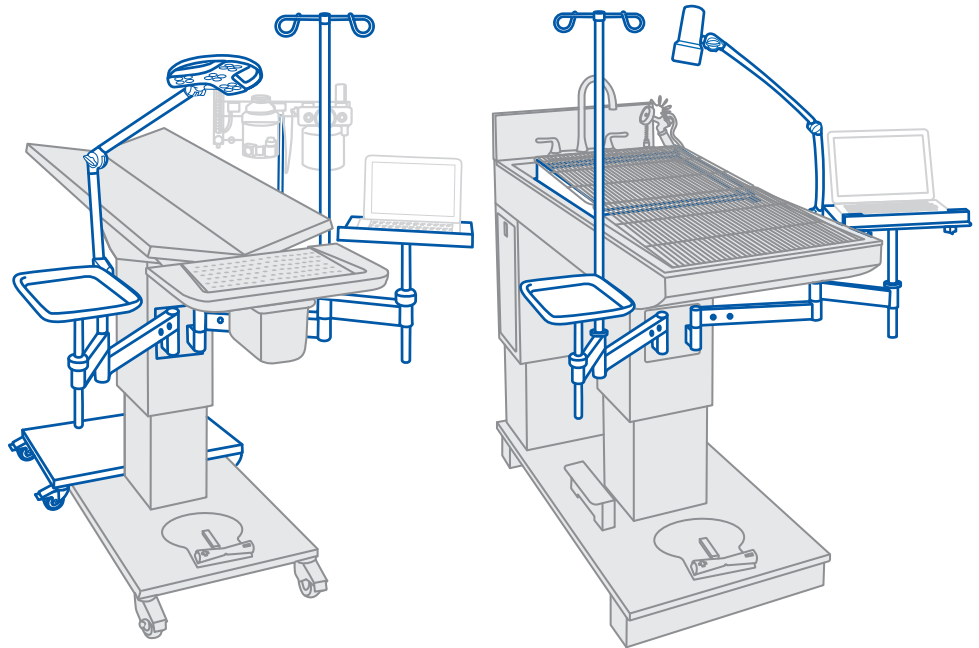

Ideal for a high-volume dental practice, or where a plumbing connection is not available.

- ☐ With Warming System  
#50920
- ☐ Without Warming System  
#50910

#### Olympic Hi-Lo Wet Table

Ideal where a plumbing connection is available or where table will be used both for dentistry and treatment.

- ☐ Base Unit  
#51001

## Design a Surgical Suite

### Choose Your Surgical Table

#### Olympic Precision Surgical Table

For soft tissue surgeries.

- ☐ With Warming System  
#52102
- ☐ Without Warming System  
#52101

#### Olympic Advanced Surgical Table

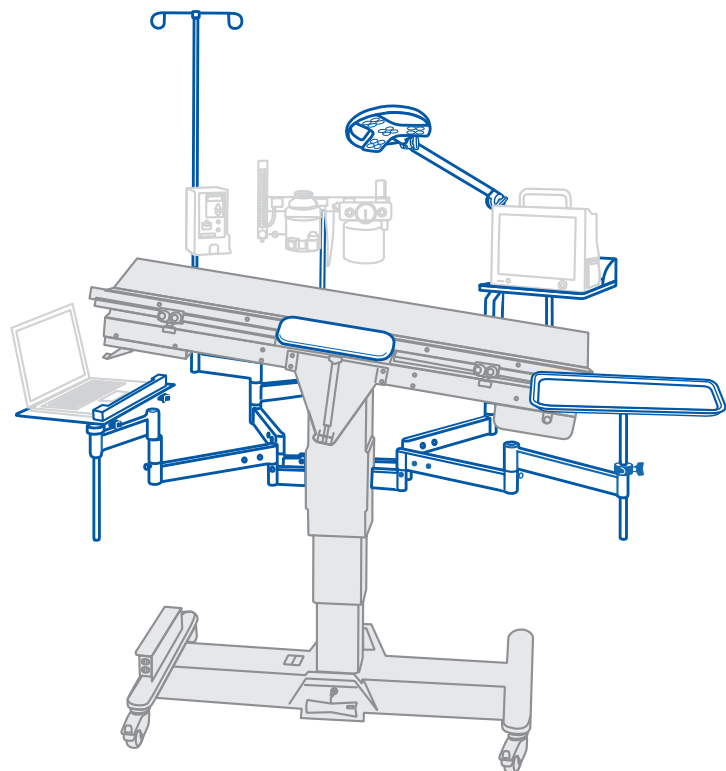

For soft tissue, orthopedic, and complex surgeries.

- ☐ With Warming System  
#51802
- ☐ Without Warming System  
#51803

#### Olympic Ultimate Surgical Table

For laparoscopy, bronchoscopy, orthopedic, soft tissue and complex surgeries.

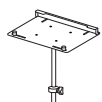

- ☐ With Warming System  
#52202
- ☐ Without Warming System  
#52201

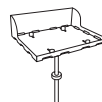

## 2 Select Olympic Accessories for your table

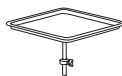

- ☐ **IV Pole #51081**  
Sturdy stainless steel IV Pole suitable for hanging fluid pump and small patient monitor.

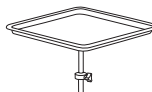

- ☐ **Laptop Tray #50988**  
Height-adjustable swiveling tray securely holds laptops up to 11" x 14".

- ☐ **Patient Monitor Tray #50990**  
Height-adjustable swiveling tray securely holds patient monitors.

- ☐ **Standard Instrument Tray #51087**  
10" x 13" stainless steel instrument tray mounted on height-adjustable platform.  
**Recommended for Dentistry**

- ☐ **Large Instrument Tray #51884**  
13" x 19" stainless steel instrument tray mounted on height-adjustable platform.  
**Recommended for Surgery**

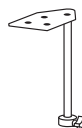

## 3 Select an Anesthesia Unit Adapter For Your Table

- ☐ **Multi-Purpose Anesthesia Adapter #50992**
- Vetland VSA-2100-CP
  - Matrix VMS
  - Surgivet CDS 9000

- ☐ **Multi-Purpose Anesthesia Adapter II #50998**
- Matrix VME
  - Eagle Eye Millennium

- ☐ **Multi-Purpose Anesthesia Adapter III #50999**
- Vetamac Dream and Dream+

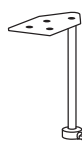

- ☐ **Supera M2600**  
No adapter required

- ☐ **Versa II and Versa Compact**  
No adapter required

## 4 For Dentistry: Select a Dental Unit Adapter For Your Table

- ☐ **Multi-Purpose Dental Unit Adapter #50993**
- Dentalaire DTP00603 and DTP00511
  - Inovadent HS4 (54023)
  - Ultima 250 (54037-1)

- ☐ **Adapter for iM3 GS Deluxe Dental Unit #50997**

- ☐ **Adapter for iM3 Elite and Pro 2000 Dental Unit #50994**

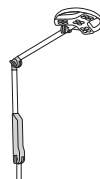

## 5 Select Lighting For Your Table

- ☐ **Olympic LED Exam Light #50970**  
LED Procedure light with adjustable arm. 30,000 lux, 4400K color temperature, continuously dimmable.

- ☐ **Olympic Advanced LED Procedure Light #50971**  
LED Procedure light with adjustable arm. 50,000 lux, 3500K-4400K color temperature adjustment, 7" light diameter, five dimming levels.

- ☐ **Olympic SoloMax LED Procedure Light #50972**  
Our most powerful light. Often replaces the need for overhead lighting. 60,000 lux, 3500K-4400K color temperature, 8.3" light diameter, four dimming levels.  
**Recommended for Dentistry**

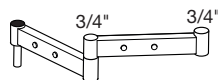

- ☐ **Olympic Magnifier with Hands-Free Wood's Lamp #50973**  
6500K daylight white color temperature, 1.9x magnification, 6.3" wide lens, continuous dimming, and integrated Wood's Lamp.

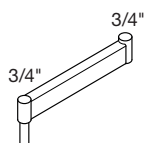

## 6 Select Swing Arms

**Total Number of Accessories:** \_\_\_\_\_  
Steps 2-5

- Notes:**
- 4 accessories requires 2 Standard Swing Arms.
  - Each additional accessory requires an Arm Extension.

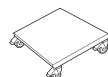

- ☐ **Standard Swing Arm #51086**  
Holds up to 2 accessories. Attaches to base table.

- ☐ **10" Arm Extension #50996**  
Attaches to a Standard Swing Arm or another Arm Extension to add 1 additional accessory socket.

## 7 Add procedure-specific accessories

- ☐ **Compressor Cart #50985**  
For Olympic Advanced Dental Table™

- ☐ **Grate Tilt Insert #51082**  
For Olympic Hi-Lo Wet Table™

- ☐ **48" x 24" Dry Top #51085**  
For Olympic Hi-Lo Wet Table™

- ☐ **Limb Holder #51882**  
For Olympic Surgical Tables

# Olympic Precision Surgical Table™

## NEW PRODUCT!

The Olympic Precision Surgical Table is designed for the busy general practice that is focused primarily on soft tissue procedures. It offers:

- *Ergonomic Comfort Features*
- *Patented Easy-Clean™ Design*
- *Floating Swing Arms for mounting most surgical support equipment*

### Cleaning Has Never Been Quicker or More Efficient

With Olympic's Easy-Clean™ Design, all surfaces are clearly visible and easy to reach. Foot switches are shielded from splatter with protective covers. No more caster stands cluttering the surgical suite.

### Ordering Information

Olympic Precision Surgical Table - Warmed..... Model 52102  
Olympic Precision Surgical Table - Without Warming ..... Model 52101

**To Design A Custom Surgical Table, See Page 6**

## All 3 Olympic Surgical Tables Include These Convenience Features

### Fully Customizable in Just Seconds for Each Procedure

The key to improving efficiency and preventing repetitive strain injuries is positioning everything you need at your fingertips, so that you are never reaching awkwardly for controls or supplies. Only Olympic Surgical Tables feature floating swing arms that allow you to position one or more instrument trays, an IV pole, patient monitor, anesthesia unit and laptop in the precise locations that best fit your reach, minimizing strain on your arms, shoulders, neck and back.

### Your Operatory Moves Up and Down as a Single Unit

You can now move from seated to standing with ease, either for ergonomic comfort or better patient visualization. The Precision Surgical Table is built to hold up to 4 accessories. The Advanced and Ultimate Surgical Tables hold up to 8 accessories.

### Easier Than Ever to Achieve a Deep Clean After Each Use

Olympic's Patented Easy-Clean™ Fluid Collection System eliminates the need to transport any removable parts to a sink for cleaning. Now you have a completely visible integrated fluid tray that you can wipe down in seconds to achieve a high level of disinfection. And those fluids that tend to pool up around your foot switches are also a thing of the past with our integrated foot switch covers.

### At Last...A Safe and Reliable, Built-In Warming Solution

Olympic's Thermo-Safe™ table-top warming system provides controlled warming and a clear visual display for optimal patient comfort and thermoregulation. Unlike other warming systems that rely on a single temperature sensor, the Olympic warming system continuously monitors 6 locations on the tabletop surface to help ensure a patient's safety and comfort at all times.

# Olympic Advanced Surgical Table™

## Soft Tissue – Orthopedics – Complex Surgeries

*Reinventing What Is Possible for the Modern Surgical Suite*

**Now Featuring Integrated Thermo-Safe™ Warming System!**

### Offers All the Features of the Precision Surgical Table PLUS:

#### Expanded Height Range for Greater Ergonomic Comfort

The Olympic Advanced Surgical Table enables the user to lower the tabletop to an extra short 29" or raise it to an extra tall 49". This is a full 6" taller and 6" shorter than most tables, assuring that every user can operate in ergonomic comfort, whether seated or standing. The expanded height range also offers the surgeon better visualization of the surgical site.

#### Greater Flexibility with Quick-Connect Accessories

The Advanced Surgical Table comes standard with 4 swing arm sockets pre-installed on the central column (vs. 2 on the Precision Model), allowing for the integration of up to 8 accessories for increased freedom of movement around the table.

#### Extra Weight Capacity for Even the Largest Patients

The Advanced Surgical Table uses a state-of-the-art electric lift that provides 50 lbs of additional patient weight capacity, raising the patient weight limit to 275 lbs, assuring you can accommodate even the largest patients. And you can load up to 40 lbs of surgical support accessories on each swing arm compared to 30 lbs on the Precision model.

#### Advanced Styling for Ease of Movement and Cleaning

The sleek styling of this table is designed to facilitate easier movement around the table and reduce cleaning time between procedures.

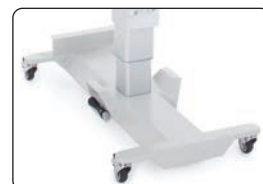

**Expanded Height Range 29–49"**

**275 lb Patient Weight Capacity**

**2 Additional Column-Mounted Sockets**

**Contoured Base for Easy Cleaning**

# Olympic Ultimate Surgical Table™

## Laparoscopy – Orthopedics – Complex Procedures – Soft Tissue Maximum Flexibility for All Types of Surgeries

Now Featuring  
**Integrated Thermo-Safe™  
Warming System!**  
(Optional)

### NEW PRODUCT!

#### Fully Adjustable Tabletop

**Lateral Tilt Frame**  
Tilts table top 30° left  
or right on long axis.

**Adjustable V-Top Panels**  
From flat to 45° independent  
of Lateral Tilt.

**Trendelenburg and  
Reverse Trendelenburg**  
Tilts table head-up or  
feet-up to 15° each way.

**Floating Swing Arms**  
Places all your equipment at  
your fingertips. Supports up  
to 40 lbs on each swing arm.

**Two Drain Pans**  
Collects fluid at both  
ends of the table.

**Height Adjustment Foot Switch**  
One on each side.

**Lateral Tilt Foot Switch**  
One on each side.

**Hospital-Grade Casters**  
Easy to move table for cleaning.

#### Ordering Information

Olympic Ultimate Surgical Table  
Warmed ..... Model 52202

Olympic Ultimate Surgical Table  
Without Warming ..... Model 52201

**To Design A Custom  
Surgical Table, See Page 6**

### Includes All the Features of the Advanced Surgical Table PLUS:

#### Dedicated Foot Switches on Each Side of the Table

Efficient foot controls and paddles allow the surgeon to adjust a patient fully in 3-dimensional space: Head-up or head down, tilt left or tilt right, table fully lowered or table fully raised, tabletop in a 'V' or tabletop flat. It's never been easier to optimize the visualization of anatomical structures and create a clear path for instruments.

#### Easy for Surgeon to Move from One Side to the Other

By lifting the anesthesia unit and other surgical equipment off the floor and onto its swing arms, the area around the surgical table is unrestricted, providing a clear path for the surgeon to move from one side of the table to the other during a procedure.

#### Converts in Seconds from Open to Laparoscopic Surgery

This is the only table that allows you to convert seamlessly from a laparoscopic spay to an open surgery in just seconds, with no parts to remove or add to the table. And with its integrated fluid control channel, this table can be quickly cleaned and prepared for the next procedure.

#### Designed to Support the Following Procedures and More

Laparoscopic spays (OVE and OVH), Cryptorchid Castration, Gastropexy, liver, kidney and lung biopsies, Thoracoscopy, Cystoscopy, Splenectomy, Cholecystectomy and other complex procedures.

Lateral Tilt to 30°

Forward/Backward  
Trendelenburg Tilt 15°

Dual Foot Switch Controls  
on Each Side of Table

Fluid Collection Pans  
at Both Ends of Table

# Olympic Surgical Support Gurney™

## The New Standard of Care for Surgical Prep, Transport and Recovery

### NEW PRODUCT!

*Transports, Weighs and Monitors*

*Provides Anesthetic and Oxygen Support*

*Carries Deployable Radiolucent Stretcher for Imaging*

*Transforms Into Post-Surgical Recovery Bed*

### Helps Reduce Patient Stress

Until now there has been no seamless way to move compromised or critically ill patients through the surgical environment without significant physical disruption to the patient. With its included IV Pole and the ability to add an on-board vital signs monitor and dedicated anesthesia unit (with 2 E-tanks), the Olympic Surgical Support Gurney is the all-in-one solution that can move each patient seamlessly from prep to surgery, from surgery to imaging and from imaging to recovery.

### Helps Prevent Staff Injuries

The awkward transport of critically ill or interoperative patients is one of the primary sources of workplace injuries. These transfers require quick action, involve awkward navigation through crowded or obstructed hallways and often require pushing additional wheeled carts for IV fluids and anesthesia. With everything you need integrated into a single gurney, the Surgical Support Gurney makes for calmer, smoother and quicker transports.

Moving patients between surgery and x-ray imaging is a particular pain point in many hospitals. The Surgical Support Gurney nearly eliminates all lifting from this process, creating a seamless transfer platform for sliding the patient from one surface to the other. And challenging recoveries no longer require a technician to sit on the floor with the patient. The integrated post-surgical recovery bed allows staff to nestle up to the patient at a comfortable and safe height.

### Saves Valuable Surgery Time

The integration of so many tools onto one transport gurney saves valuable minutes throughout the day. With its integrated precision scale, you can get an accurate weight at the push of a button whenever you want it, eliminating the awkward process of trying to catch a weight on a compromised or non-ambulatory patient. And because patients now arrive in the surgical suite connected to a transferable vital signs monitor, there is far less patient setup time.

# Safer for the Patient and Caregiver

## A Fully Mobile Solution

The Olympic Surgical Support Gurney is designed to move easily anywhere in your hospital and to accommodate patients up to 200 lbs.

## Transfer Patients Without Lifting

With or without the hard top stretcher, the Surgical Support Gurney facilitates smooth transfers to and from the surgical table.

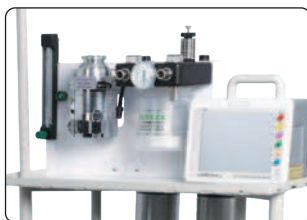

## Seamless Transfers to Imaging

The radiolucent hard top can be lifted up and slid onto the x-ray platform with no disruption in care.

## Patient Recovery From A Comfortable Seated Height

Now you can lower the patient to a comfortable height and proceed with continuous monitoring and oxygen support.

## Your Choice of Ancillary Equipment

Table accommodates Supera, Vetland and Versa Compact tabletop model anesthesia units and most mid-size monitors.

## Integrated Scale (Optional)

Large, easy to read. Swivel mounted. Can weigh active animals. Accuracy  $\pm 0.1$  lb. Lifetime quality.

## Hard Top Stretcher Retention Posts

Insert to hold the hard top firmly in place for transport. Twist out to release hard top.

## 2 Foot Switches

For faster and convenient height adjustment, there are two foot switches, one on each side of the table.

## Integrated Power Strip

7 electric outlets for connecting all your accessories and equipment. Conveniently located at end of table near equipment shelf.

## Corian® non-slip surface

Table top surface is lifetime Corian® from DuPont, the ideal surface for modern hospitals. Feels warmer than stainless steel, is non-skid so your patients remain calm, wipes clean with disinfectants and features a no-drip edge. Choose from 4 standard colors/patterns.

## Treatment and Transport For The Modern Hospital

The Olympic Easy-Lift is a convenient easy-roll gurney that weighs less than half of most other lift tables, but with a higher patient weight capacity. You can use this table for treating and prepping, and then roll it into x-ray, surgery, recovery, or any other area of your hospital—even outdoors.

The Easy-Lift is lightweight, has large casters, steering handles, and includes four integrated sockets that can accommodate any combination of Olympic accessories, so it can transform in just seconds from a gurney to an exam table to a treatment table. With so many uses, this table tends to stay in motion throughout the day.

Now available in the original 46" x 22" tabletop size and new 50" x 22" size, with a precision scale option. Scale operates on 6 D batteries that will power the bright LED display through years of daily use.

# Olympic Versa-Lift™ with Quick-Lock™

The one electric lift for all your hospital's needs

New...Quick-Lock Model with Central Locking Brakes

**Transport Gurney**

**Treatment/Exam Table**

**Curbside Transport**

**NEW**  
Now available  
with an Integrated  
Precision Scale!

## Saves Time and Helps Reduce Lifting Injuries

The Olympic Versa-Lift is as efficient as a Swiss Army Knife in adapting quickly to your changing procedural needs, transforming in seconds from a curbside medicine gurney to an exam table or treatment table. And it is so easy to navigate that a single operator can move patients from x-ray to surgery to recovery with ease.

## The Only Table With Drop-In Accessories

The Versa-Lift includes 2 drop-in sockets (4 sockets on the Quick-Lock with Scale) that can accommodate an Olympic IV pole, Laptop/Monitor Tray or Instrument Tray so you can modify the table on the fly to meet your changing needs. There is also an optional headrest extender that increases the overall length of the table to an extra-long 62".

## New Quick-Lock™ Model

The Versa-Lift is now available in 3 models: the Standard, Quick-Lock™, and the Quick-Lock™ with Scale. Both Quick-Lock™ models include all the features of the standard model plus Central Locking Brakes, a second foot switch and a patient weight capacity of 300 lbs.

## Reduces Disruption of Compromised Patients

The Versa-Lift Quick-Lock includes 2 removable stretchers – a soft stretcher perfect for cocooning anxious patients and a hard stretcher for holding larger patients or where immobilization is required. The Soft Stretcher is optional on the Standard Versa-Lift. Both stretchers include 2 Velcro® tie-down straps. And because these stretchers come off the gurney, you lift the stretcher, not the patient, which is better for the patient and the caregiver.

## A Workhorse Table That Will Never Let You Down

The Olympic Versa-Lift is a heavy-duty piece of equipment designed to meet you where you are, whether that means the parking lot, the operating room or anywhere else in your facility. This is not a timid gurney. Its solid chassis and hospital grade casters allow you to navigate speed bumps, curbs, potholes and thresholds while providing the smoothest possible ride to your patients. And the robust power system will provide you with up to 2 weeks of use on a single charge.

# Safer for Patients and Staff

## Mobile Exam and Treatment Table

A drop-in IV Pole, Instrument Tray and Laptop Tray. Quickly transform gurney into extra procedure table.

## Lift the Stretcher, Not the Patient

Safer. Helps prevent injuries. Perfect for transfers from the back of vehicles.

## Precision Digital Scale

Bright LED screen with large, easy-to-read numbers. Accuracy  $\pm 0.1$  lb with weight averaging. Easy to calibrate. Can lock to KG or LB display mode.

## 2 Lift-Off Stretchers

The removable Stretcher top is securely held by 4 posts but can be quickly lifted off for moving patients from the Versa-Lift to x-ray tables, cages or recovery mats. The 2-person stretcher prevents back strain, complies with safety standards. Speeds up patient handling.

**Hard Stretcher**  
Molded of reinforced polymer. X-ray radiolucent. Non-slip surface. Wipes clean. Durable. 2 Velcro® straps.

**Soft Stretcher**  
Fabric is medical-grade, anti-bacterial Herculite™. Strong aluminum frame. Wipes clean. X-ray radiolucent. 2 Velcro® straps.

**Versatile** – The Olympic Versa-Lift will save you time and labor every day. This mobile electric lift combines three useful pieces of equipment for the price of one. Quickly pays for itself.

**Patient transport** – Easy to roll and steer. Lightweight—just 68 lbs for Standard model, 85 lbs for Quick-Lock—less than half the weight of most electric gurneys. Moves patient quickly from one department to another. Saves time.

**Patient transfer** – The lift-off stretcher makes transferring patients from the Versa-Lift to tables and cages faster and safer.

**Treatment/Exam Table** – The Versa-Lift is also a comfortable, height-adjustable treatment table that can be used anywhere needed. IV Pole and other accessories fit into sockets on table.

**Protects against back injury** – No more lifting heavy patients. The height adjusts from 12" up to 41" with electric lift. Complies with ergonomic standards.

**Curbside pick-up** – The Versa-Lift is sturdily built for outdoor use. The electric lift with removable stretcher makes extracting injured animals from cars easier, safer. Then just roll the patient into the hospital. For low-boy transport use pull-out handle.

**Improves patient care** – Compromised patients are no longer subjected to traumatic lifting and handling. Injured patients can be immobilized on the hard stretcher.

**Full-range lift** – Adjusts smoothly from near floor up to 41". Capacity, 250 lbs (300 lbs for Quick-Lock models). Fast recharging and up to 2 weeks between charges.

**Saves floor space** – One piece of equipment with 3 functions: a curbside transport, an easy-roll gurney and an exam table.

# Olympic Fold-Up Gurney™

## Saves Space – Folding Gurney – Treatment Table

### Lift-off Stretchers

The top is a stretcher held securely on 4 posts that easily lifts off for transferring or lifting patients. Helps prevent back injuries and makes moving patients safer and faster. Eliminates awkward handling of compromised patients.

### Treatment and Exam

When used with the Hard-Top Stretcher, the Fold-Up becomes an exam/treatment table. Provides a non-slip surface, a fluid drain port and an integrated bucket hook.

### Safety Lock

Durable pin automatically locks when gurney is opened. Easy release allows for quick and efficient storage.

STORES

**Hard Stretcher**  
For transport and treatment of injured and other patients. Molded of reinforced polymer. X-ray radiolucent. Non-slip surface. Wipes clean. Durable. 2 Velcro® straps.

**Soft Stretcher**  
For all patients. Fabric is medical-grade, anti-bacterial Herculite™. Strong aluminum frame. Wipes clean. X-ray radiolucent. 2 Velcro® straps.

Scan For More Info

**Ideal for clinics with limited space** – A transport gurney that folds out of the way and doubles as an exam/treatment table.

**Folds and unfolds in seconds** – To unfold, just spread the sides apart and an automatic safety lock holds it open. To close, release lock.

**Rolls and steers easily** – Large casters and steering handles at both ends. Turns on a dime.

**Lightweight and strong** – Weighs only 27 lbs but can carry 200 lbs. All welded construction.

## Ordering Information

# Olympic Ultra-Lite Gurney™

## Storage Space and Lift-Off Stretchers

**Versatile** – An easy-roll gurney that can speed up patient transport, and be used for exams and treatments. Plus, it's got extra room for storage.

**Ultra lightweight gurney** – Because this gurney weighs only 31 lbs—just a fraction of what other gurneys weigh—it rolls effortlessly on its 4 large, swiveling casters.

**Larger patients** – The Ultra-Lite Gurney is 52 inches long and can carry patients up to 250 lbs. Heavy-duty construction.

**Extra storage** – The generous storage space can hold up to 100 lbs of supplies and equipment (in addition to patient load).

### Exam and Treatment

The Olympic Hard Top Stretcher converts the Ultra-Lite gurney into a treatment table. Provides a non-slip surface, a fluid drain port and an integrated bucket hook.

### Transport

5 inch casters for smooth, controlled transport. Steering handles at both ends allow for tight turns in crowded spaces and narrow hallways.

### Lift-off Stretchers. Safer. Easier. Faster.

The stretcher is held securely on 4 posts but easily lifts off for transferring or lifting patients. This lift-off stretcher helps reduce back injury and makes moving patients safer and faster. Eliminates awkward handling of compromised patients.

# Olympic Elite Folding Exam Station™

**See Your Patients In A Whole New Light**  
*Comfort - Convenience - Advanced Styling*

## NEW PRODUCT!

Scan For More Info

### All-In-One Exam Room Solution

The Olympic Elite Folding Exam Station™ is a wall-mounted unit designed to replace all the cabinets and work surfaces in your exam room. With a built-in scale, two integrated power strips, a dedicated storage shelf and two swing arms that can hold up to four pieces of ancillary equipment, you can now work in ergonomic comfort with everything you need in front of you and at your fingertips. This means you will never again need to turn your back on a patient or client to take notes, reach for supplies, adjust your exam lighting, or hold a Olympic Hands-Free Wood's Lamp. You'll also enjoy the convenience of integrated USB ports for keeping your laptop and phone well charged. And because everything in your exam room is off the floor, cleanup between procedures has never been easier or quicker.

### Makes A Great First Impression

Your investment in the most advanced veterinary equipment and technologies often remains invisible to your clients, who rarely see beyond the exam room. This is where the Elite Folding Exam Station shines. On entering your new modern exam room, your clients will be greeted by the green glowing lights of the Olympic Sterility Indicator

System. This provides comforting assurance that the exam room has been thoroughly cleaned in preparation for their visit. Next, they will notice the minimalist styling, the sparkling white Corian surfaces, the bright digital scale, integrated exam lighting and laptop station. This all speaks to your commitment of being at the vanguard of veterinary medicine.

### Adaptive Technology That Evolves To Meet Your Needs

The Elite Folding Exam Station includes color-selectable LED ambient lighting that casts a welcoming light over the room and provides a great opportunity for your client to snap a memorable keepsake photo of their first visit to your hospital. This is a lifetime workstation designed to go with you through future remodels or moves. To adapt easily to your architectural plans, the Elite Folding Exam Station includes identical power strips and swing arm sockets on each side of the table. Our commitment to innovation does not stop with your initial equipment installation. As the future unfolds, Olympic will continue introducing new accessory integrations for your swing arm sockets and storage shelf.

# Integrated Precision Digital Scale – Folds Away to Save Space

## Folds Away to Save Space

The table folds down and stows against the wall when not in use.

## Accessories Can Be Added and Height-Adjusted Without Tools

Olympic accessories drop into sockets on the swing arms. Table can be used with or without accessories.

## Patients are At-Ease on the Grippy, Non-Reflective Corian Surface

The Elite Folding Exam Station is suitable for patients up to 60 lbs. Tabletop surface measures 40" x 21".

## Storage Shelf

The 21" x 11" storage shelf provides all the space you need for commonly-used supplies or equipment.

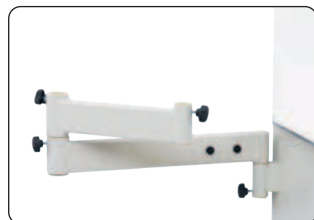

## LED Color Selection Switch

Table will glow Red when awaiting cleaning, Green when ready for next patient. Pink and Blue can be assigned to best meet hospital's communication needs.

## Folds Easily

Gentle-Touch levers control gas struts that allow tabletop to fold down gently when not in use, while providing assistance when lifting into place.

## Swing Arms for Olympic Accessories

Double-socket swing arms are available to mount in the sockets on either side of the table. Each can hold up to 2 Olympic accessories.

## Precision Digital Scale

Built-in precision scale under the Corian® top. Scale has weight averaging, accuracy  $\pm 0.1$  lb, lb/kg selection, large, easy-read numbers. Lifetime accuracy guaranteed.

### Improve Patient Comfort and Access

The warm feeling Corian® top is non-slip and non-reflective, so your patients can stand comfortably and calmly during an exam. Because Corian® reads like flooring material to most patients, there is less hesitation in stepping onto the table top. And the quiet, smooth lift mechanism makes it easy to adjust to any height without startling the patient. This table can be set up in the middle of a room with 360° patient access or pushed against any wall. Plug in or operate cord-free on battery power.

### Adapts to Fit Your Changing Needs

The Olympic Elite Exam Lift Table is fully customizable for your procedural needs throughout the day. 2 drop-in sockets at the back of the table hold a sturdy 11"x20" Equipment Shelf with integrated hooks for stethoscope or clippers. 2 additional sockets can hold an Olympic IV Pole, LED Procedure Light, Instrument Tray, Swiveling Laptop Tray or a Patient Monitor Tray. Because all accessories drop into sockets, no tools are required to make changes.

# For Your Exam Room – Adjustable Height – 360° Patient Access

## Adjustable Height

Better patient presentation for all patients large and small during any type of examination. Adjusts to comfortable standing or seated height for operator. Smooth, quiet electric lift has a capacity of 250 lbs. 2 foot switches, one on each side.

## Full Patient Access

The Olympic Elite Exam Lift Table is free standing, not a built-in, so you have instant access to the patient from 4 sides for fast and thorough examinations. Saves time, improves patient care. Large Corian® surface, 54" x 22".

## Corian® – Patient Friendly

The Corian® top is warmer feeling and non-slip – patients stand comfortably and calmly during exams. Also, non-reflective so they aren't spooked by mirror-images and lights. No clawing at table. (See Corian® below.)

## No More Lifting

With the Elite Exam Lift Table there is no more awkward lifting of heavy patients—and less likelihood of injuries for your staff. Large patients can walk on when the non-slip Corian® table is near floor level.

## Fully Enclosed

The electric lift is fully enclosed in a telescoping column. Safer when other pets or children are in the exam room. And cleaner, with no exposed machinery to collect hair. Faster clean-up.

## Scale Built-In – Folds Down

A precision scale is built in under the Corian® top. Scale has weight averaging, accuracy  $\pm 0.1$  lb, lb/kg selection, large, easy-read numbers, and is swivel mounted for angle viewing. Lifetime accuracy guaranteed.

## Modern, Attractive

The Elite Exam Lift Table makes any exam room look more attractive. The handsome Corian® top and sleek enclosed column creates an impressive modern look. Makes your hospital environment more pleasing to caregivers, clients and patients.

## Corian® to Match Your Décor

Corian® combines beauty with durability. It is the lifetime material from Dupont that never ages. Select from these standard color-patterns.

# Olympic Advanced Treatment Station™

A complete solution for all your weighing,  
treatment and transport needs.

## Built-in Precision Scale – Always at the Ready

The Olympic Advanced Treatment Station includes a precision scale that swivels and tilts so it is always at an optimal viewing angle. The self-calibrating scale maintains a  $\pm 0.1$  lb accuracy – whether you are weighing a 250 lb pot belly pig or a 1 lb bird. And the weight averaging function locks in quickly, even on active patients. Also includes a 'last weight' recall button.

## Customizes in Seconds with 6 Drop-In Sockets

This work station is designed for efficiency and ergonomic comfort, standing or seated. All your instruments, monitors and other equipment are at your fingertips to save you time. And since all the accessories are mounted on the table, it eliminates floor clutter and saves space. Create the optimal workspace for each procedure with an Olympic IV Pole, Laptop Tray, Patient Monitor Tray, Swiveling Instrument Tray, LED Procedure Light or Equipment Shelf.

## Convenience Features

The Advanced Treatment Station features an on-board power strip, 8 tie-down cleats, steering handles, 2 foot switches and a long-life rechargeable battery.

Scan For More Info

## Reduces Handling of Compromised Patients

The Advanced Treatment Station is designed to navigate easily from exam to treatment, x-ray, prep, surgery or recovery – and even outdoors. By combining patient treatment and transport, it reduces the handling of injured or compromised patients and saves time. The built-in scale is especially helpful when medications need to be administered and there is no time to use the floor scale.

## Patient-Friendly, Non-Slip Corian® Tabletop

Table features an optional Corian® top, the ideal surface for modern hospitals. Corian feels warmer than stainless, is non-skid and non-reflective so patients are more relaxed during exams and treatment. Features anti-drip edge around perimeter.

# Precision Scale is Built-In

## For All Procedures and Transport To or From the Surgical Suite

### Equipment Shelf

For monitors and other equipment. Easy to see and reach. Mounts at head of station. Electrical equipment connects directly to power outlets on table (see below).

### Integrated Scale

Large, easy to read. Swivel mounted. Can weigh active animals. Accuracy  $\pm 0.1$  lb. Lifetime quality.

### Electrical Outlets

7 electric outlets for connecting all your accessories and equipment. Conveniently located at end of table near equipment shelf.

### 2 Foot Switches

For faster and convenient height adjustment, there are foot switches on both sides of the table.

### Quick-Connect Accessories for Advanced Treatment Station

Convert your lift table from an exam table to a treatment table in seconds by dropping Olympic accessories into the integrated sockets.

### Corian® non-slip surface

Table top surface is lifetime Corian® from DuPont, the ideal surface for modern hospitals. Feels warmer than stainless steel, is non-skid so your patients remain calm, wipes clean with disinfectants and features a drip edge. Choose from 4 standard colors/patterns.

### Ergonomic and Efficient

The Advanced Treatment Station offers ergonomic comfort with full-range height adjustment, up to an extra tall 40". Work standing or seated. Improved patient presentation. The rechargeable electric lift is quiet, smooth and features two foot switches, one on each side.

### Patient Transport – Multi-Purpose

An easy-roll patient transport. It has steering handles and is light weight so it turns easily in tight spaces. Now you can seamlessly move patients between treatment, x-ray, prep, surgery, recovery.

### Specifications

# Olympic Ultrasound Table™

## The Ultimate Ultrasound Table...Now With a Choice of Two Table Tops

*Work in Greater Comfort – Help Reduce Stress Injuries*

### Save Time on Every Procedure

This is the first height adjustable table designed specifically for veterinary ultrasound. It incorporates several unique features to help improve imaging in any patient position—dorsal or lateral—and to enhance comfort for the operator and assistant.

With the electric lift you can adjust the table height for perfect presentation of both large and small animals and to minimize physical strain for the operator during long scans. Two adjustable gel pad armrests add to operator comfort.

A heavy-duty swing arm can support your portable ultrasound machine so you can position it at your fingertips to save time. Three probes can be conveniently stored on this same swing arm, and the arm pushes out of the way when you are setting up the patient.

The Olympic Ultrasound Table has two special cutouts in the transparent top that provide access for echocardiography, and

the transparent top makes probe positioning easier and more certain. The cutouts have covers that can be used when smaller animals are positioned near the side of the table.

The Olympic Ultrasound Table saves time on every scan and reduces the threat of repetitive motion injury for the operator. It rolls easily where needed and will serve your growing ultrasound practice for years to come.

### Echocardiograms

Two cutouts in the transparent top are specially designed for echocardiograms. In this photo the patient is being set-up. The dog will be moved to the left so its thorax is over a cutout. The operator's arm is supported by an armrest while the assistant comfortably controls the patient. The operator can continuously adjust the table height with the foot switch for optimum position.

## Efficient – Saves Time – Better Images

### Maximum Comfort for Both Ultrasonographer and Technician

Ergonomic design helps prevent repetitive stress injuries for both the operator and the assistant.

Model US-1 Pictured

Scan For More Info

#### Covers for cutouts

Covers fit into cutouts to provide a solid surface. Note: small probe hole in the center for scanning small animals. An additional cover fits small hole.

#### Armrests

Two gel pad armrests. Angle of each armrest can be adjusted to help reduce strain.

#### Other features

**Electric lift** – A smooth, quiet, adjustable lift minimizing hand lifting, positions patient. Capacity 250 lbs. Tabletop height adjusts from 22" up to 48".

**Rolls easily** – 4 locking casters permit table to be moved when not in use or for room cleaning.

**Storage space** – The space under the top surface offers a large storage area for supplies, which are easy to see and reach.

## About Olympic Veterinary

Jay Jones

Joe Reback

Olympic Veterinary is a leading manufacturer of precision equipment to transport, examine and treat companion animals. Each Olympic table or gurney is thoughtfully designed to save time and space, help prevent injuries and support a wide range of clinical needs.

Olympic Veterinary was founded in 2007 by Jay Jones and Joe Reback, who entered the veterinary world after decades of experience at Olympic Medical designing and manufacturing life-saving neonatal

equipment. Olympic Veterinary was created to bring this same spirit of medical innovation to the veterinary world.

Each piece of equipment is manufactured with pride here in the USA and supported for the life of your investment. At Olympic, you will always be greeted by real people who value your time and the importance of what you do.

Olympic is the preferred choice of thousands of veterinary hospitals in the U.S. and Canada. We look forward to showing you how we can be of service to your hospital.

"I would highly recommend the Olympic Dental Table for anyone looking to replace their current dental set-up. It has greatly reduced the amount of time it takes to perform dental radiographs and cleanings by making patient placement easier and more convenient, and it's so much easier to maneuver around with everything off the floor."

Fawn Dougherty, Hospital Manager  
Larkin Veterinary Center  
West Lawn, PA
