

# Olympic Precision Surgical Table™

## NEW PRODUCT!

The Olympic Precision Surgical Table is designed for the busy general practice that is focused primarily on soft tissue procedures. It offers:

- Ergonomic Comfort Features
- Patented Easy-Clean™ Design
- Floating Swing Arms for mounting most surgical support equipment

### Cleaning Has Never Been Quicker or More Efficient

With Olympic's Easy-Clean™ Design, all surfaces are clearly visible and easy to reach. Foot switches are shielded from splatter with protective covers. No more caster stands cluttering the surgical suite.

### Ordering Information

Olympic Precision Surgical Table - Warmed..... Model 52102  
Olympic Precision Surgical Table - Without Warming ..... Model 52101

### Fully Customizable in Just Seconds for Each Procedure

The key to improving efficiency and preventing repetitive strain injuries is positioning everything you need at your fingertips, so that you are never reaching awkwardly for controls or supplies. Only Olympic Surgical Tables feature floating swing arms that allow you to position one or more instrument trays, an IV pole, patient monitor, anesthesia unit and laptop in the precise locations that best fit your reach, minimizing strain on your arms, shoulders, neck and back.

### Your Operatory Moves Up and Down as a Single Unit

You can now move from seated to standing with ease, either for ergonomic comfort or better patient visualization. The Precision Surgical Table is built to hold up to 4 accessories.

### Easier Than Ever to Achieve a Deep Clean After Each Use

Olympic's Patented Easy-Clean™ Fluid Collection System eliminates the need to transport any removable parts to a sink for cleaning. Now you have a completely visible integrated fluid tray that you can wipe down in seconds to achieve a high level of disinfection. And those fluids that tend to pool up around your foot switches are also a thing of the past with our integrated foot switch covers.

### At Last...A Safe and Reliable, Built-In Warming Solution

Olympic's Thermo-Safe™ table-top warming system provides controlled warming and a clear visual display for optimal patient comfort and thermoregulation. Unlike other warming systems that rely on a single temperature sensor, the Olympic warming system continuously monitors 6 locations on the tabletop surface to help ensure a patient's safety and comfort at all times.
